

CLOAKROOM

Lockers for "clean" and "dirty" industries

These 2-unit one-piece lockers are available in two versions: one for "clean" industries, and the other for "dirty" industries.

The "dirty industry" version features a full, fixed vertical separator that divides each unit into 2 x 150 and 250mm areas, for separating work clothes from leisure clothes. The "clean industry" model does not have this separator.

Both models have a hat shelf, and a plastic-coated rod that is as wide as each unit.

One-piece frame, high feet (150mm) with protection to avoid floor scratches, hinged doors with top and bottom rear air vents, label holder, can be padlocked. High-resistance baked glycerol paint coating.

dimensions	VEA SC 402	VEA PC 302
(mm)	"dirty" industry	"clean" industry
Overall	800 x 500 x 1950	600 x 500 x 1950
