

PIPEMASTER REPLACEMENT HEADS

7683548

10 MM. REPLACEMENT HEAD

Suitable for 10mm. copper pipe & fittings

Heads are removable for cleaning, storage or replacement with a different size.

Always allow to cool before removal from tool.

Shims are provided with each set of heads – These ensure excellent heat transfer between the element & head.

Constructed of copper with a nickel plate

N.B. The surface finish of the heads is important to the thermal efficiency of the tool. Excessive flux, other burnt on deposits, or mechanical misuse can degrade this finish & should be avoided.

Clean heads with careful use of a nylon scouring pad to avoid removing the nickel plating.

ALSO AVAILABLE 8MM, 12MM, 14MM, 15MM, 16MM, 18MM & 22MM.
