

Machine Solutions

OEM Machine Solutions - M238 Starter pack special

> March 2013

Our Modicon M238 is a flexible, compact, optimised and programmable automation controller offering an exceptional price-performance ratio. When combined with our Magelis STUHMI, with built-in web-server functionality and innovative 22mm panel mounting, it will provide you with a freely programmable, highly connectable solution for a wide range of machine control.

The comprehensive IEC61131 SoMachine integrated software environment allows rapid application code development with dedicated and bespoke function block implementation and re-usable libraries.
