

# Product Information

## SPRAYDUSTER - Aerosol Duster

Product Code: SDU 125D/200D

Packaging: 125ml aerosol  
200ml aerosol

### DESCRIPTION:

A can of pure compressed gas, is excellent for blasting dust and other debris out of key wells and other hard-to-reach areas. Sprayduster has an adjustable velocity and is safe to use at any angle without the risk of propellant emission.

### WHERE TO USE

Computer hardware - will clean all hard to reach areas.

Printers - for blowing out paper dust and particles.

Keyboards - will remove dust and dirt from key interfaces.

### HOW TO USE

Direct jet of air towards the area to be cleaned ensuring that dust is transferred away from the equipment. Slight flexing of the valve stem to one side while depressing the actuator gives precise flow control. Short sharp bursts are recommended to avoid excessive cooling of the can that may occur with a continuous burst.

### SELLING POINTS

1. New high-velocity performance.
2. Special progressive valve to control velocity.
3. Operates even when inverted without expelling liquid propellant.
4. Compact lightweight aerosol.
5. Highly cost-effective when compared with expensive valve systems.
6. Non-CFC or HCFC propellant.
7. Aluminium can is 100% re-cyclable.
