

Independent electronic code lock

Unitecnic 200/300 allows the setup of an access control system for entries and may be programmed directly from the control head, with no programming tool required.

- Up to 1,000 codes capacity.
- Interchangeable control head for inside installation.
- Battery supplied with warning signal.
- Quick and easy installation to any existing European cylinder, to any European standard mortice locks.
- Free entrance may be programmed from the control head.

With Unitecnic 300, it is possible to identify up to 1,800 different users, authorise access according to variable and hourly schedules, and record the last 500 entries.
