

950 PKL/9 BM N L-key set, metric, BlackLaser

Hex-Plus

9-piece set. Wera Hex-Plus tools have a larger contact surface inside the screw recess. This reduces the notching effect and thereby also the deformation of the screwhead. At the same time up to 20 % more torque can be transferred. The ball-end on the long arm of the hexagon L-keys enables angled access to drive screws in awkward places. Hexagon L-keys with BlackLaser surface treatment for outstanding surface protection and long service life. High corrosion protection. The size of each L-key has been engraved by a laser making it easy to find the right tool. The wear-resistant clip material ensures that the L-keys are securely held yet are easy to remove.
