#### Product Highlights

- Maximum high-speed UDMA performance and reliability
- Dramatically improves transfer speeds from card to computer\*
- Includes Image Rescue™ 3 software to recover lost or deleted photo, video, and audio files
- Includes Corel® Paint Shop Pro® X to extend picture-taking-enhance, edit, and manage photos from the desktop
- Includes Lexar Backup n Sync™ software to backup, sync, and share your photos
- Limited lifetime warranty

#### Professional-Level UDMA Memory Technology

Lexar offers a comprehensive line of award-winning memory cards in various speeds, formats, and capacities, which include innovative features and valuable free software. With so many options, it's easy to find the perfect Lexar memory card to fit your workflow needs.

New UDMA CompactFlash® (CF) technology provides the ultimate high-speed memory card performance for professional photographers and photo enthusiasts. The Lexar Professional UDMA 300x memory card dramatically increases card-to-computer transfer rates when paired with a UDMA-enabled reader, as well as provides support for the next generation of high-resolution UDMA-enabled digital SLR (DSLR) cameras. Lexar Professional UDMA CF cards are available in 2GB, 4GB, and 8GB capacities, and work with all CF devices.

#### Advanced Speed and Innovation

**Blazing Card-to-Computer Download Speeds.** The Lexar Professional UDMA CF card offers the ultimate performance available today when used with a UDMA-enabled device. These cards deliver incredibly fast download speeds to satisfy the demand for faster transfer rates from card to computer, drastically reducing post-production time. Available in a range of capacities up to a massive 8GB, these cards deliver industry-leading read/write speeds with a minimum sustained write speed capability of a blazing 300x (45MB/sec) in all capacities.

**Includes Valuable Extras.** The Lexar Professional UDMA 300x CF card includes Lexar Image Rescue™ 3 software, which reliably recovers most photo, video, and audio files, even if they've been erased or the card has been corrupted.\*\* The software can also reformat the card, securely delete images, and report on the overall condition of the card, so you can ensure it's in perfect working order for your next shoot. What's more, you can backup, sync, and share all your valuable photos with Lexar Backup n Sync™ software, powered by Sharpcast. And extend your picture-taking with the ability to enhance, edit, and manage photos from your desktop using the full version of Corel® Paint Shop Pro® X software. All software is available for free download with purchase of the card.

**Unmatched Performance and Reliability.** The advanced technology and blazing speed of the Professional UDMA 300x CF card drastically improves download time, and also leverages the power of the next generation of UDMA-enabled DSLR cameras. Lexar Professional UDMA cards come with a limited lifetime warranty and a free, dedicated customer support line. With huge capacities and valuable software, the Lexar Professional UDMA 300x CF card provides advanced memory card performance so you can focus on the business of photography.

**DISCLAIMERS:**

- \*When used in conjunction with a UDMA-enabled reader.
- \*\*Image or other data recovery is not 100% guaranteed.

The Lexar "x" speed rating describes minimum write speed capability where x=150KB/sec sustained write speed.

Actual usable memory capacity may vary. 1MB equals 1 million bytes; 1GB equals 1 billion bytes.

Software offerings may vary depending on product ship date and store. Please check product packaging for included software offerings.
