## Cam switch configuration

---

|                      |                          |
|----------------------|--------------------------|
| Configuration type   | Cam switch configuration |
| Ampere type          | IEC / cULus              |
| Current rating (Ith) | 10                       |

### Mounting type & Handle type

|                      |                       |
|----------------------|-----------------------|
| Chamber System       | Normal                |
| Switch Mounting      | Door                  |
| Handle Mounting      | Snap-on               |
| Handle Type          | Nose handle           |
| Front Plate          | 32x32mm / 1.26x1.26in |
| Handle Colour        | Black                 |
| Handle IP-protection | IP66                  |

### Connections & Options

|                                     |                                 |
|-------------------------------------|---------------------------------|
| Connections                         | Standard box (tunnel) terminals |
| Gold plated contacts                | -                               |
| Contact chambers rotated 90 degrees | No                              |
| Additional front lettering plate    | -                               |
| Metallic handle shaft               | -                               |

---

### Front plate

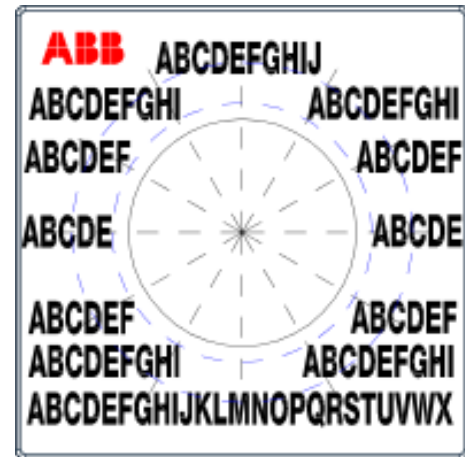

|                        |            |
|------------------------|------------|
| Spring Return Function | -          |
| First position         | 0          |
| Last position          | 60         |
| Total number of steps  | 3          |
| Angle system           | 30 degrees |
| Stop at last position  | Yes        |

| Power loss per contact - at rated $I_{th}$           | Standard contacts                                     |             | W               | ≤ 0.6     | ≤ 1.8     |
| Contact resistance                                   | Standard contacts                                     |             | Ohms            | ≤ 0.004   | ≤ 0.003   |
| Power loss per contact - at rated $I_{th}$           | Gold contacts   |             | W               | 0,4       | ≤ 1.8     |
| Contact resistance                                   | Gold contacts   |             | Ohms            | ≤ 0.006   | ≤ 0.003   |
| Minimum switching capacity                           | Gold contacts   |             | mA              | 5         | 5         |
|  | Gold contacts   |             | V AC/DC         | 5         | 5         |
| Terminals  | Max cable cross section, solid/stranded <sup>3)</sup> |             | mm <sup>2</sup> | 0.5...1.5 | 1.5...4   |
| Mechanical endurance <sup>5)</sup>                   | 8 Contacts and less                                   |             | Number          | 500 000   | 500 000   |
|  | 9 to 14 Contacts                                      |             | of              | 300 000   | 300 000   |
|  | 15-24 Contacts  |             | operations      | 100 000   | 100 000   |
| Temperature  | Storing and operational <sup>2)</sup> temperature     |             | °C              | -40...+80 | -40...+85 |

<sup>1)</sup> 400 V

<sup>2)</sup> At 40°C, derating 0%. Current peaks up to 60°C, derating 0%.

<sup>3)</sup> Use copper wire only

<sup>4)</sup> These values are given for guidance and may vary acc. to the motor manufacturer

<sup>5)</sup> The mechanical endurance ratings are dependent on the switching angles and the number of contacts. The ratings shown represent the minimum values achieved. Higher ratings may be available upon request..

## Ratings according to UL 60947-4-1

Standards UL 60947-1, UL 60947-4-1, CSA C22.2 no. 60947-1-13, CSA C22.2 no. 60947-4-1-14.
