RS PRO Plastic Flexible, Split Conduit, Black

Stock number: 875-0249 875-0251 875-0255 875-0258 185-4061

EN

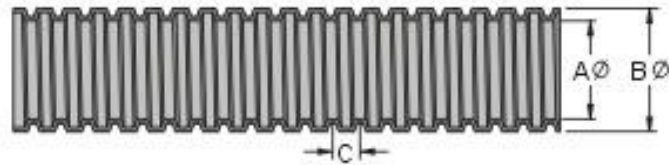

SPECIFICATION

- Material: PP

Description

Conduits are the trunk or pipes which cover electrical wiring and cables. These conduits are used to protect and guide cables through dangerous places from damage or accident. To make them more popular in the most of the situation.

Electrical conduits are usually made of flexible material, or material that can be bent, such as plastic, steel, metal or fibers. Now days, modern conduits are made from RoHS materials, to make them more function.

Unit : mm
