

The EPP-3 can program 27xxx devices by means of the list of general devices. In order to program 27xxx devices the programming specs of the device (which are no a days provided freely on the internet) can be usefull (just follow the links on our WebSite: <http://www.artbv.nl>).

EPP-3 Device List

General Devices	Vpp	Algorithm	AMD	ATMEL	IMT	SST	SYNCMOS
