## STANLEY FATMAX® Bolster Screwdriver Flared 10 x 200mm

FMHT0-62621

### Features:

- Apply extra torque with a wrench using the hex bolster
- Narrow waist and smooth domed end for fast spinning action and more control
- Colour coded with large soft grip handles for comfortable use and easy selection
- Large handle offers secure grip and increased torque

### Description:

The STANLEY FATMAX® Bolster Screwdriver Flared 10 x 200mm has been designed so that extra torque can be applied to the hex bolster using a wrench. The large handle provides a secure grip and added torque. The tri material handle has a moulded inner core for strength and tpr overlay delivers a comfortable grip. The narrow waist and smooth domed end allows for faster spinning action and improved control. The soft grip handle design offers a perfect grip and reduction in fatigue during application. The colour coded end offers easier identification for selecting the correct screwdriver for the correct application.
