Product Overview

The Box for Arduino is the perfect enclosure for any Arduino project: the internal mounting plastic pins are designed to fit in all Arduino boards.

The box is designed for the Arduino Duemilanove and the Arduino Mega, with the Ethernet Shield mounted on top.

A 9V battery will fit in the back, with a little opening slot, very helpful for wireless projects.

Arduino board, Ethernet Shield or battery pack not included

The box measures: 62mm wide x 112mm deph x 35mm (39mm) height.

The box is designed to host Arduino Duemilanove *or* Arduino Mega; you'll have to break the two central plastic pin to make the Arduino Mega fit in the box.

The sliding slot of the Ethernet Socket is removable, as is the battery slot.

The material is PC-ABS V0, UL 94 flame retardant. It's UV filtered, chlorine and bromine free.
