■ **Wire Seal Examples**

The Quick Connect Series offers several sealing options to accommodate many design requirements. The QC connectors can be used unsealed, or with additional items can be sealed up to an IP68 watertight seal. Below are a few examples of possible sealing options. Refer to the back fittings section to see a complete list of all of the options.

Description	Components
Provides seal against insulation on individual wires.	
Provides seal between connector and adapter, and against jacketed cable.	
Provides seal against insulation on individual wires, between connector and adapter, and against jacketed cable. Includes strain relief.	

Notice

Diameter .18-.43 (4.5-11.0) cable sealing, compression fittings must be correctly tightened to achieve IP68 watertight seal.

Tools & Contacts

The Quick Connect Series uses special contacts and tools. The contacts are smaller and designed for high pin density. Removal tools along with multiple crimp tools are available and are designed to work with the smaller contacts and tighter pin arrangements. The Common Contact System and tools are not compatible with the Quick Connect Series.
