Converter Cable

CC-4M6P

2 x 4-Pin Molex to 1 x 6-Pin Pci-e
Power Converter Cable

Features & Specifications

The CC-4M6P Converter Cable converts two 4-Pin Molex Power Supply power cables to one 6-Pin Pci-Express power cable.

This is compatible with any Power Supply with two or more Molex Power Connectors and will power any Pci-e Device requiring one Pci-e Power Connection.

If your Graphics Card or other Pci-e Device requires more than one 6-Pin Pci-e power connection, multiple CC-4M6P converter cables can be used, provided you have enough free molex power cables.
