

LED LENSER® K3 Key-Ring Torch

This advanced mini-pocket torch has its own integral light focusing and is ideal for home, camping, automotive and emergency use. It has a bigger head for a wider range, and features the Blue Moon Focus System, which creates a tantalising blue edge around a central bright white light cone. The user can adjust this focus from flood to spot beam, thereby providing suitable light for near or more distant viewing. This beam reaches up to an impressive 33 metres at 15 lumens yet the K3 is less than seven centimetres in length and just 34 grams in weight. This German engineered torch is designed to stand the test of time and is built with an exceptionally strong aluminium casing holding 4 x AG13 batteries (supplied). Also includes a key-ring attachment and push-button operating switch.

As a leading international brand of hand-held torches and head lamps, LED Lenser is renowned for superior German engineering, outstanding performance, and state-of-the art technologies, such as the patented Advanced Focus System and Smart Light Technology. Constantly driving innovation to provide class-leading lighting instruments, LED Lenser is the brand of choice for professional tradesmen, emergency services personnel, search & rescue teams and serious outdoor enthusiasts. LED Lenser hand torches and head lamps deliver breath-taking, bright homogenous white light, that turns night into day and simply has to be seen to be believed. Using only the finest materials, such as energy-efficient CREE LED light chips, aircraft-grade aluminium and gold-plated contacts, they are renowned for quality and have a reputation for reliability that is second to none.

- Advanced mini pocket torch
- Energy efficient LED Light Chip
- Reliable German engineering
- Flood to spot beam focusing via single-handed Speed Focus sliding head
- Smart, yet robust aluminium casing
- End-cap switch
- Water and dust resistant. IPX54

Technical Information

Size: 68 x 20mm Ø

Power: 15 lumens max

Run Time: up to 2 hours

Beam Distance: up to 33m

Weight: 34grams

Supplied with : Batteries (4xAG13)
