

THE NEW

Mad Grip®

The evolution of grip, comfort and durability

Mad Grip® by Polyco features evolutionary injection moulded protection zones with thermoplastic rubber tread surface, which gives this glove incredible grip and outstanding resistance to abrasion.

Made up of a combination of plastic and rubber, the thermoplastic rubber coating has the abrasion resistance of plastic combined with the elasticity of rubber. This, coupled with its excellent comfort and dexterity, combines to make the Mad Grip® a truly evolutionary glove. A general handling glove that is suitable for a variety of tasks, the Polyco Mad Grip® features a breathable seamless liner made from a combination of cotton, nylon and spandex which provides a comfortable fit. The pre-curved palm and finger construction avoids bunching and conforms to the natural shape of hand.

Case Quantity
12 pairs per box
48 pairs per case

Handling Applications

- Construction – Building Materials Handling
- Medium to Heavy Engineering Work
- Manufacturing – Materials Handling & Assembly
- Metal Fabrication
- Scaffolding

Size	Code
