

## RS PVC criss-cross glove

ENGLISH

PVC crossed glove is a seamless knitted general use glove with a PVC criss-cross coating providing excellent grip and tear resistance. Its seamless knitted construction is close fitting, breathable and adapts to the hand's movement offering maximum flexibility and allowing for continuous wear without irritation. The highly tensile clear PVC criss-cross coating optimises surface performance and contributes to the glove's high tear resistance. Covering the entire hand, the PVC coating allows for the glove to be worn on either hand considerably extending the life of the glove. The elasticated knit wrist ensures a secure fit and keeps the hands free from dust and debris. The criss-cross glove is an extremely comfortable glove that offers good value for money and provides secure handling in order to get the job done safely.
