

1/4" Longframe Molded Patchcord

Introducing Switchcraft's redesigned 3-conductor 1/4" Longframe audio patchcords. Now made with a low capacitance 110 Ohm cable, it is ideal not only for analog applications but also for digital AES/EBU audio and SMPTE time code patching. The overall flexible jacket is available in seven attractive colors. The overmolded rubber flex handle-boot reduces strain off the cable when pulled or tugged. The overmold covers a metallic shell which greatly reduces crosstalk. The nickel plated plugs ends are non-tarnishing as well as self-cleaning when used with Switchcraft MT series patchbays.

• Mil Spec Series: M642

• Standard plug terminations are 1/4" Longframe

• Plug handle is molded thermoplastic

• Plugs: Tip Rod, Ring and Sleeve - Copper Alloy

• Cable: 26 AWG (30x40) OFBC, 110 Ohm Low Capacitance Jacket is Matte PVC

Part Numbering System

Standard Foot Lengths	Cable Color Codes
1'	
2'	Black = BK
3'	Red = R
4'	Orange = O
5'	Yellow = Y
6'	Green = GN

7'	Blue = BL
8'	Gray = GY
9'	
10'	

Custom lengths are available by request.
1 meter is equal to 3.28 feet.
