1. DESCRIPTION

- Products designed to distribute power as close as possible to equipment
- Provision of several types of current (current strengths, voltages) with industrial and/or domestic pin configuration
- Supply for one or more devices
- Protection of users and circuits:
 - Connection and disconnection while de-energised using units equipped with Prisinter or interlocked socket controlled by switch
 - Protection by MCB, RCBO, RCCB, etc.
- Material: plastic
- Colour: RAL 7022
- IK: 09
- IP 44, IP 66/67-55, IP66/67

2. USE

- Cover integral with the body
- Rotary switch with double mechanical interlock
 - 1st interlock: the switch cannot be energised if the plug is not fully inserted
 - 2nd interlock: the plug cannot be removed when the switch is energised
- Markings showing switch ON and OFF positions
- Padlockable switch
- Transparent window for quick viewing of protection devices
- Numerous metric pitch cable entries (top, rear, bottom)
- Equipped with or for equipping with panel mounting sockets with standard fixing centres
- Captive stainless steel external screws
- Units can be placed side by side in the same plane

3. RANGE

3.1 Undrilled or pre-drilled units

Cat. No.	Type	D x H x W	Max. no. of sockets	No. of Lexic modules
0 598 41	Undrilled	120 x 230 x 120	2 x 16 or 32A	None
0 598 42	Undrilled	181 x 370 x 230	6 x 16 or 32A	None
0 598 43	Undrilled with window and rail	120 x 370 x 140	2 x 16 or 32A	6 *
0 598 44	Undrilled with window and rail	181 x 370 x 230	4 x 16 or 32A	9 *
0 598 45	Undrilled with window and 2 rails	181 x 740 x 230	6 x 16 or 32A	2 x 9
0 598 49	Undrilled double window and 2 rails	181 x 370 x 230	None	2 x 9
0 598 46	Pre-drilled with window and rail	173 x 470 x 160	2 x 16 or 32A	6
0 598 47	Pre-drilled with window and rail	181 x 370 x 230	4 x 16 or 32A	9
0 598 48	Pre-drilled with window and 2 rails	181 x 740 x 230	6 x 16 or 32A	2 x 9
0 598 50	Pre-drilled without window	181 x 370 x 230	6 x 16 or 32A	None

(*) Do not use RCBOs, only MCBs + RCCBs.

- IP44, IP 66/67, IP 66/67-55 according to the sockets installed
- Supplied without cable glands
- Pre-drilled units are supplied with screws and nuts for fixing panel mounting sockets with standard fixing centres
- Can be equipped with a 100 or 160 VA transformer
- Lock Cat. No. 017 66 for units with window

		3P + N + E	0 591 15

3.9 Unit for refrigerated containers

Perishable products are transported throughout the world in refrigerated containers by land, sea and air. Hence the use of this combined unit for refrigerated containers by major transport companies (container terminals, transit hubs, railway stations, ports, airports, warehouses, transport by sea, etc.).

3P+E 32 A 440 V unit - earth pin located in "3 o'clock" position, equipped with a switch and an IP 66/67-55 socket outlet.

			IP 66/67 - 55
440 V	32 A	3P + E	0 596 95

Associated mobile products:

Plug: 0 529 46

Mobile socket: 0 529 86

Associated fixed products:

Panel mounting socket: 0 529 26

Appliance inlet: 0 529 36

5. CONNECTION AND PROTECTION DEVICES

5.1 Connection of socket outlets

Cross-section of the cables inside the unit according to the current used:

- 16 A socket: 2.5 mm²
- 32 A socket: 6 mm²
- 63 A socket: 16 mm²
- ELV socket: 2.5 mm² at the primary
..... 2.5 mm² at the secondary

NB: Wiring with pilot wire (see § 8):

The pilot wire is a control conductor associated with the power conductor.

Its interruption controls breaking of the power circuit via a contactor. This is an arrangement which provides an electrical response to the obligation to break circuits above 32 A (decree of 14/11/88). An additional (shorter) pin is therefore added to the various socket models to provide this "pilot wire" function.

5.2 Connection of protection devices

Copper cable	rigid	flexible
• DNX ³ and DX ³ PH + N, with or without RCD	16	10
• DX ³ 4500 - 6 kA DX ³ 6000 - 10 kA DX ³ 10000 - 16 kA ≤ 63 A and add-on earth leakage modules ≤ 63 A	35	25
• DX ³ 10000 - 16 kA 80 to 125 A	70	50
• DX ³ 25 kA ≥ 32 A (C curve) ≥ 16 A (D curve) DX ³ 36 kA, DX ³ 50 kA and add-on earth leakage modules	50	35
Auxiliaries	2.5	2.5
Auto. terminals connection cross-section • DNX ³ and DX ³ Ph + N	4	4

5.3 Types of protection device and number of modules

Upstream, Hypra equipped units or those to be equipped can integrate various types of modular protection device, depending on the catalogue number:

- MCB
- RCBO
- RCCB

NB: it is important to check, according to the required use, that protection against indirect contact (RCDs) and against overloads and short-circuits (MCBs) are both provided.

Caution: an RCCB does not provide protection against overloads and short-circuits.

Short-circuit resistance: for the short-circuit resistance of the modular circuit breakers (MCBs), RCBOs and RCCBs, refer to the performance pages for these products in the current Legrand catalogue.

Ratings for units equipped with RCCBs

Ratings	Sensitivity
- 16 A 25 A RCCB - 32 A 40 A RCCB - 63 A 63 A RCCB	30 mA

5. CONNECTION AND PROTECTION (continued)

6. TECHNICAL FEATURES

Tests

6.1 Glow wire test

Housing: 650°C

Live parts: 850°C

6.2 Dielectric strength

2500 V if equipped with IEC sockets

2000 V if equipped with NFC sockets

6.3 Usage temperature

• With mechanical interlock only: - 20°C/+ 100°C

• Equipped with RCCB: - 15°C/+ 40°C

• Equipped with MCB: - 15°C/+ 40°C

• Equipped with RCBO: - 5°C/+ 40°C

Derating of circuit breakers according to the ambient temperature:

A standard circuit breaker is set to operate at In at an ambient temperature of 30°C.

Its nominal features are modified according to the ambient temperature in the unit in which the circuit breaker is located.

For example: temperature derating table for DX³ 6000 A/10 kA circuit breakers (Cat. No. 4 077 84)

In (A)	Ambient Temperature/In

6. TECHNICAL FEATURES (continued)

6.4. Resistance to chemicals

Chemicals	Plastic
Acetaldehyde	++++
Acetic acid	--
Ammonia 10%	++++
Benzene	++++
Benzol	--
Bleach	-
Bromine	--
Butanol	+++
Carbon tetrachloride	--
Chloroform	++++
Chromic acid 50%	--
Citric acid	++++
Cream	++++
Cresols	--
Diesel oils (20, 30, 40, 50)	++++
Distilled water	++++
Domestic fuel oil	++++
Dry chlorine	--
Ethanol	++++
Ether	++++
Ethyl acetate	++++
Formic acid	--
Fruit juice	++++
Fuel oil	++++
Glucose	++++
Glycerine	++++
Heptane	++++
Hydraulic oils	++++
Hylene	++++
Kerosene	++++
Lactic acid	+++
Lard	++++
Lime	++++
Liquid propane	++++
Lubricating oils (1, 2, 3, 5A, 5B, 6)	++++
Methanol	+++
Molasses	++++
Nitric acid 20%	--
Nitrobenzene	+++
Olive oil	++++
Paraffin	++++
Perchloric acid	--
Petroleum	++++
Phenol 10%	--
Potassium bicarbonate	++++
Potassium chlorate	-
Potassium permanganate	--
Salt water	++++
Seawater	++++
Silicone	++++
Silver nitrate	++++
Sodium bicarbonate	++++
Sodium chlorate	--
Sulphuric acid <10%	-
Toluene	++++
Turpentine	+++
Uric acid	++++
Vinyl chloride	++++
Whisky and wine	++++
Zinc chloride	++++
Zinc sulphate	++++

++++ : Excellent resistance
- : Limited resistance

+++ : Good resistance
-- : Poor resistance

6. TECHNICAL FEATURES *(continued)*

6.5 UV resistance

No change of colour or deterioration of the material according to the test described below:

Duration of the test: 168 hours

Infrared and ultraviolet filter to be as similar as possible to the solar spectrum

6.6 Ageing test

No change of colour or deterioration of the material according to the test described below: 7 days at + 80°C

6.7 Resistance to harsh environments (IP66/67 - 55)

Resistance to industrial cleaning procedures:

high pressure pre-wash/wash with detergent/high pressure - high temperature wash

The other settings are identical to those of the degreasing pre-wash test.

Result: all the products tested have successfully passed the tests with detergents according to the specifications given above.

→ **Degreasing pre-wash test:** test conducted with a high pressure device set between 70 and 90 bars.

Hot water between 70 and 80°C.

Spraying from a distance of 50 cm for one minute with no direct application on the product being tested.

→ **Cleaning with detergent:** two detergents are applied: Galorox acid and Galorox 3%.

Each detergent is sprayed all round the product for 10 seconds. The detergent is then left to take effect for 30 minutes.

→ **Wash:** high pressure device set between 110 and 120 bars.

Spraying of hot water between 70 and 80°C.

The other settings are identical to those of the degreasing pre-wash test.

Result: all the products tested have successfully passed the tests with detergents according to the specifications given above.

7. STANDARDS AND REGULATIONS

- IEC 60 309.1 and NF EN 60 309.1 (design rules)
- IEC 60 309.2 and NF EN 60 309.2 (dimensional interchangeability requirements)
- NF EN 60 439.1 (rules for combined units)
- IEC 62 262 and NF EN 62 262 (IK)
- IEC 60 529 and NF EN 60 529 (IP)
- Decree of 14/11/88 (safety of workers)

9. ACCESSORIES FOR COMBINED UNITS

For fast, adaptable installation, create your unit to suit your own specific requirements, combining panel mounting sockets (with standard fixing centres) with pre-drilled units and accessories on undrilled or pre-drilled units.

Cat. No. 0 521 18
Adaptor plate for IP 44 and IP 66/67-55 domestic sockets

Cat. No. 0 521 19
Adaptor plate for ELV sockets

Cat. No. 0 521 24
Blanking plate

Cat. No. 0 539 49
IP 55 adaptor base for Mosaic mechanisms (except surface mounting type)

Cat. No. 0 017 66
850 key lock

Cat. No. 0 521 95
Bag of screws and nuts

Cat. No. 0 521 18

Cat. No. 0 521 19

Cat. No. 0 539 49
