

## De-Solv-It Spray

De Solv It tackles all known stains such as grease, tar, gum, wet paint, crayon, coffee, blood, make-up, inks and grass, removing them from virtually all surfaces including skin and hair.

### Pack Size

100ml and 200ml aerosol sprays.

### Cleaning Instructions

Spills and stains are best treated as quickly as possible.

### Washable Fabrics

Remove any excess staining by blotting the affected area first. Shake the can well and spray onto the stain on both sides of the fabric. Leave for 5 minutes before gently blotting the stain with a dry absorbent cloth. Re-apply De.Solv.It and wash the garments in accordance with the manufacturer's instructions.

### Hard Surfaces

Manually remove as much of the residue as possible then apply to clean dry cloth and moisten area and leave for 2-3 minutes or longer in severe cases. Wipe away the residue and wash the treated area with soapy water.

### Carpets and Absorbent Surfaces

Care must be taken on foam or rubber backed carpets to avoid the product seeping into the backing. Apply to clean dry cloth and moisten the stained area, blotting towards the centre to avoid spreading the stain.

### Skin and Hair

Use sparingly on affected area. For gum or adhesive in hair leave to work for about 2-3 minutes but avoid contact with scalp. Wash treated area thoroughly with warm soapy water.

DO NOT APPLY DIRECTLY TO CLOTHING AND LEAVE IN CONTACT WITH SKIN AS THIS MAY CAUSE IRRITATION.
