

## TDK DVD+R 4.7GB 16x Printable Matt Spindle - DVD+R47PWWCBED100

Mnfr Code: **DVD+R47PWWCBED100**

From preserving family memories to protecting important data, TDK 4.7GB DVD+R media offers the widest compatibility with computer drives and home DVD players. Ideal for general purpose recording, a single TDK DVD+R has ample capacity for thousands of digital photos, up to six hours of video and behemoth mission-critical data files. Each DVD+R disc can be fully recorded once. As DVD recording speeds have increased, the importance of using name brand, quality media has become paramount. When a DVD+R is recorded at high speeds, the fast RPMs of the recording process require an advanced, ultra-sensitive recording material capable of compensating for the abbreviated exposure to the drive laser. Specially formulated with a rapid phase-change recording layer, TDK DVD+R media products maximize the data transfer rate while minimizing the potential for errors. The discs have been thoroughly tested and verified to outperform other media brands, which may rely on slow-reacting, error-prone phase-change materials.

### Product Specifications

Manufacturer	- TDK
Model	- DVD+R47PWWCBED100
DVD Recording Capacity	- 4.7GB
Sides Used	- Single Sided
Certified Recording Speed	- 1X to 16X
Form Factor	- DVD+R Media
