

Tremor-Low™

The vibration reducing glove that's dextrous

Tremor-Low™ from Polyco consists of a foamed neoprene coating that is formed into a series of ridges all over the palm and fingers to produce an anti-impact/vibration absorbing surface.

There are hundreds of jobs in a wide range of industries that involve the use of hand-held vibration tools and equipment. If precautions are not taken, regular and frequent exposure to vibrating tools or work process can cause serious injury. The unique coating of the Tremor-Low™ acts to minimise the effects of vibration by absorbing vibration energy and reducing transmission to the palm and fingers. Unlike other impact gloves, the Tremor-Low™ has been designed in such a way that it allows for maximum flexibility, affording the wearer a greater level of dexterity. In addition to this it offers good cut, tear and puncture resistance and provides an excellent grip. The back of the hand has a smooth coating that provides additional protection to the knuckles. The glove's flexibility, anatomical shape and soft knitted seamless liner ensure comfort at all times.

Case Quantity
10 pairs per polybag
50 pairs per case

Handling Applications

- Maintenance
- Engineering Work
- Public Utilities Work
- Forestry
- Power Tool Use

Size	8	9	10
Code	8762	8763	8764
Length	26cm	27cm	27cm
