TRANSPORTER

**Make a head start with
the right portable storage**

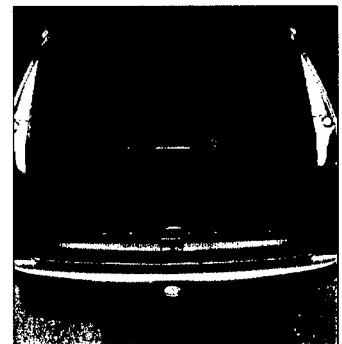

Professional users need equipment that can be relied on to work – every time and in every detail.

TRANSPORTER is the perfect solution for professionals who want everything right at hand, so they can have a head start every time.

Just as with other quality tools and equipment, you can't initially see the main advantages of TRANSPORTER. It simply does its job, and does it exceptionally well.

Ergonomics is the study of the way people work, their tools and how they use them. The focus is quite simply to make things as straight-forward and comfortable as possible.

We have put the conclusions of all these studies to good use.

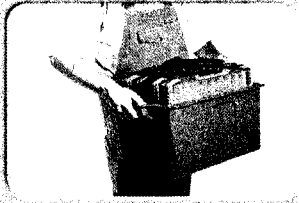

The result is that the user benefits from all the carefully considered details that can save time, irritation – and money.

So make sure you enjoy all the advantages that no-one can see.

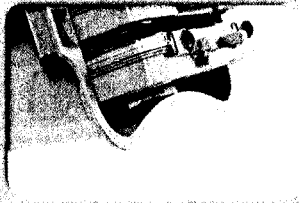

TRANSPORTER

Handles on the sides

- make it easier to carry whilst maintaining the correct balance

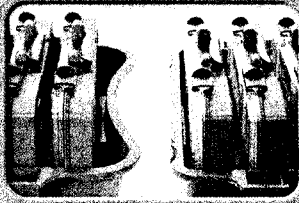

Ergonomically correct shape

- carefully designed shape ensures the most comfortable carrying position

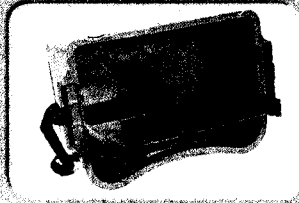

Carrying strap

- strong carrying strap leaves both hands free whilst carrying

Stand-alone and connected

- well-designed slots and pegs mean joining several TRANSPORTERs together is quick and easy

Layout of your choice

- the shelves can be arranged to suit each user's particular requirements

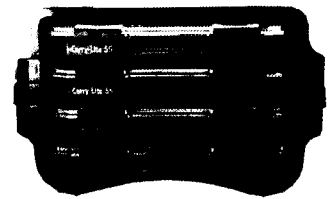

Vehicle use

- it is easy to mount TRANSPORTER units in any vehicle, using an optional fitting bar (sold separately).
