

Interface Kit for LVDS TFT Displays

IES-TIK-AMxxxxxxxx

Product Overview

The IES range of TFT Interface Kits (TIK) is an advanced TFT LCD monitor control board, offering high quality images on a range of TFT products.

This single board solution enables an easy monitor and or video replacement with a large area TFT display.

The TIK has a wide input and automatic scaling range, up to WUXGA (1080x1920 pixels) at 60Hz, and in all video modes the full TFT screen is used.

Applications :

- Monitor replacement
- Adding additional monitors

Features :

- Analogue RGB D-SUB and DVI (Digital Video Interface) Inputs
- Audio in and out (2x3W 4ohm)
- Single 12v DC input voltage
- Built-in multi language On Screen Display (OSD) user interface
- Multi-sync capability up to WUXGA resolution at 60Hz
- Compatible standard VGA, SVGA, XGA, SXGA and UXGA VESA timing
