Materials	Black ABS Plastic / Grey Aluminium
Extended Height Above Desk	302mm max.
Retracted Height Above Desk	3mm
Retracted Depth Below Desk	395mm max.
Thru Desk Cut-out Diameter	81mm
Above Desk Finished Diameter	95mm
Weight (Net)	0.40kg
Weight (Gross)	0.60kg

Product Description

The new Conec2 **AV Desk Riser Pod** from **Clever Little Box** provides a simple, effective pop-up AV connectivity solution which can be **flush-mounted** into a **desk, table** or **cupboard**, etc.

These retractable audio visual poles are fully modular, designed to accept any of our **Conec2 45mm range** of **AV connector modules**; allowing a fully-bespoke, **'pick and click'** finished **AV Riser Pod** with your own combination of eight modules from a range including power, USB, HDMI, VGA, BNC, Ethernet, RJ11, plus many more.

The **CLB45DP-270A** version accepts twelve (45x22.5mm) Conec2 AV modules which, when not in use, can be pushed down to be flush with the surface. When connection with any of the **AV connector** ports is required, simply push-down and pull-up for full access to the **AV sockets**.

Manufactured in high quality black ABS plastic and aluminium, the **AV Desk Riser Pod** is easy to mount 'thru-desk' via an 81mm diameter cut-out.

Cable access is available from the bottom (for rear terminations of the AV Modules) and from the top (for front access connection of the AV Modules).

Having made your individual choice from the range of AV, data, voice and power **Conec2 Modules**, they simply click into place within the aluminium mount rails.
