

NOTE: UNLESS OTHERWISE SPECIFIED.

- 1 LABEL CONTENT: P/N, REVISION, CUSTOMER-DP, DATE CODE(WW/YY)
DIMENSIONS IN () ARE FOR REFERENCE ONLY.
- 2 CABLE MANUFACTURER AND LENGTH: OPTIONS
- 3 LOGO: OPTIONS, BY CUSTOMER
- 4 CONTACT FINISH: SELECTIVE GOLD PLATED ON CONTACT AREA,
TIN-LEAD PLATED ON SOLDERING AREA.
- 5 APPLICABLE WIRE #28 AWG~#34 AWG.
- 6 DETAILS PLS. REFER TO INDIVIDUAL COMPONENT DRAWINGS.
- 7 ASSEMBLE PER B.O.M AND WIRE LIST. DO NOT SUBSTITUTE ORCHANGE
PARTS WITHOUT WRITTEN APPROVAL FROM NI ENGINEERING.
VENDOR SHALL SUPPLY A FIRST ARTICLE TO NI ENGINEERING FOR
APPROVAL BEFORE CABLE IS MANUFACTURED.
- 8 VENDOR MAY USE ANY ONE OF THE ALTERNATIVE VERSIONS OF THE
BACKSHELL/CONNECTOR SETS LISTED ON B.O.M.
- 9 COMPRESS CABLE TO FACILITATE CLOSURE OF CONNECTOR BACKSHELL.
- 10 THE COMPLETED CABLE ASSEMBLY SHALL BE ELECTRICALLY TESTED TO
ENSURE THAT THERE ARE NO SHORTS OR OPENS AND IT IS WIRED
PER WIRE LIST. A MECHANICAL CHECK SHALL BE PERFORMED TO
ENSURE PROPER ASSEMBLY PER THIS DRAWING.

P2.34	pair 16 -	P1.66

Pin 50 and 51 are always tied to ground or a drain wire. Termination for pins 18 and 19 are different for each of assembly. Pins are grounded, or unterminated as defined below.

table 2 Personality pin connections -- pins 18 & 19 of both connectors.

Cable Length	Pin18	Pin19
0.5m	Ground (Drain wire)	Ground (Drain wire)
1.0m	No Connect	Ground (Drain wire)
3.0m	Ground (Drain wire)	No Connect

Cable Assembly Overview

New "personality" feature for version 1.1. The termination method for two pins on each connector are unique to the length of assembly. Cable is a crossover assembly with 16 individually shielded, differential pairs and 16 drain wires.

- Currently five qualified cable vendors

68pin VHDCI (0.8mm) plug (male) possibilities:

- Direct attach -- solder cable directly to connector
- Straddle mount -- paddle PCB termination.

Concerns

Confidentiality.

High level of automation is desired to maintain lot consistency, and reduce cost.

Signal integrity:

- Pair foil shields must be preserved to within 0.100" (100mils) of pair terminations.
- Differential pairs must not be opened or separated.

Production Testing

Every cable:

- Standard DC testing (continuity, and high-pot).
- High speed test on custom Cisco test fixture -- box with ten connector pairs. Test will be fast and simple -- connect ten cable, push button: Green LEDs = Pass, Red LEDs = Fail

Production lot sample:

- Network analyzer sweep to 6GHz. Eye pattern. TDR
