

LEDLENSER K1 Mini Key-Light

Here's a dinky little torch that's as light on your pocket as it is on your key-ring. Measuring just 44 x 10mm and weighing 7.5g you won't know it's there but it will certainly make its presence felt when you turn it on. Its LED delivers up to 17 lumens brightness at 16 metres – enough to light the door or car key hole from anywhere on your drive. The flat base at one end allows it to be placed on a surface and used as an emergency 'uplighter' in the event of a power failure. Finished in matt black with an anodised aluminium finish it has a textured grip and a simple twist-action switch. Takes 4 x AG3 batteries (supplied).

As a leading international brand of hand-held torches and head lamps, Ledlenser is renowned for superior German engineering, outstanding performance, and state-of-the-art technologies, such as the patented Advanced Focus System and Smart Light Technology. Constantly driving innovation to provide class-leading lighting instruments, Ledlenser is the brand of choice for professional tradesmen, emergency services personnel, search & rescue teams and serious outdoor enthusiasts. Ledlenser hand torches and head lamps deliver breath-taking, bright homogenous white light, that turns night into day and simply has to be seen to be believed. Using only the finest materials, such as energy-efficient CREE LED light chips, aircraft-grade aluminium and gold-plated contacts, they are renowned for quality and have a reputation for reliability that is second to none.

- Stylish, tactile mini key-light
- Energy efficient LED Light Chip
