ENGLISH

RS Pro White Stainless Steel DIN Rail Clamp, 11mm Bundle Diameter

Product Details:

DIN Rail Mount Cable Clamps

Designed for fast and effective fixing of screened wires and cables. Since the introduction of the EMC directive screened cables have become an essential element of electrical systems. Until now, however, installers have had to make do with fiddly fixing procedures, with the increased risk of damaging the screen.

Available in two sizes, the cable clamp incorporates a number of advanced features to provide easier installation and more effective performance. These include a stainless steel contact spring to avoid damage to the screen, high corrosion resistance, potential balance via the Busbar fixing rail and an insulated rail mounting support.

Note: Clamp uses a special type of C rail not currently stocked by RS Components. However, for supplier details, please contact the RS Technical Helpline.

Specifications:

Cable Clip/Clamp Style:	DIN Rail Clamp
Maximum Bundle Diameter:	11mm
Material:	Stainless Steel
Colour:	White
Length:	32mm
Width:	17 mm
Depth:	49mm
