

The ultimate card for professional photographers.

Professional photographers need Flash memory they can count on for even the most demanding shoots. CompactFlash® Ultimate 600x offers sustained write speed ratings of up to 600x, making it Kingston's fastest card to support high-end digital cameras and devices. It's designed to deliver superior results with fast data transfer and support for continuous shooting.

The CompactFlash 600x card features ultra-fast transfer rates of up to 90MB/sec. read and write, so you can capture more continuous, high-resolution images in less time than with traditional CompactFlash memory cards. For added peace of mind, CompactFlash Ultimate comes with a bonus download of data recovery software from MediaRECOVER® to let you recover lost or deleted files and restore corrupt files on Windows or Mac systems.

To ensure that Kingston® Flash memory solutions are among the performance leaders in their class, Kingston engineers select high-performance controllers as part of each card's design. Each card is 100-percent tested and you can rest assured that each and every CompactFlash Ultimate card has received a perfect score.

Available in capacities up to 32GB*, CompactFlash Ultimate offers plenty of room for capturing and storing high-definition video and high volumes of images in RAW, JPEG, TIFF and other large file formats. As with all Kingston Flash cards, CompactFlash Ultimate cards are backed by a lifetime warranty and the legendary reliability that makes Kingston the leader in memory.
