

1) Introduction

The Appello tone and speech annunciation sounder has three different styles in AC and DC.

- A105NAPPX Sounder
- AL105NAPP Sounder-Beacon Combination
Sounder-Beacon Combination units are available as either a high output LED or Xenon strobe.

These Sounder units share a common set of functions:-

- 4 stages, each stage can record up to 30 seconds of CD quality audio.
- Facility to record via an on board microphone or a line in input.
- The recorded message can be played back proceeded either with or without the choice of one of forty five tones.

The Beacon functions are either:-

- Xenon Strobe - 1Hz flash rate
- LED - Either Steady or 2Hz blink rate

2) Operating and Marking

All units have the following operating requirements and limitations.

Unit Type No.	Voltage	Range	Current
Sounder only outputs			
A105NAPPX DC	24Vdc	10-30Vdc	256mA
		Max Current 256mA @ 30Vdc	
A105NAPPX AC	115Vac	90-260Vac	112mA
	230Vac	90-260Vac	124mA
		Max Current 127mA @ 260Vac	

AL105NAPPX combined unit - Add selected sounder & beacon currents to calculate total current required.

	Beacon only outputs
LED Beacon DC	24Vdc 10-30Vdc 157mA
	Max Current 166mA @ 30Vdc
LED Beacon AC	115Vac 90-260Vac 60mA
	230Vac 90-260Vac 35mA
	Max Current 60mA @ 90Vac

Xenon Beacon DC	12Vdc 10-14Vdc	500mA
	24Vdc 20-28Vdc	250mA
Xenon Beacon AC	115Vac +/-10%Vac	100mA
	230Vac +/-10%Vac	50mA

Operating Temp: -20 to +55°C

IP Rating: Type 4 / 4X / 3R / 13 , IP66

Marking:

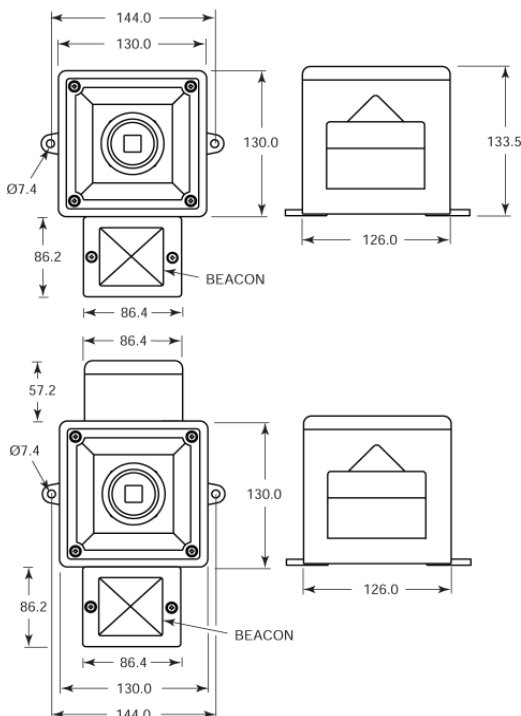

3) Installation & Wiring Requirements

A105NAPPX

AL105NAPPX

European Safety Systems (E2S) Ltd.

Impress House, Mansell Road,
Acton, London W3 7QH

sales@e2s.com Tel: +44 (0)208 743 8880
www.e2s.com Fax: +44 (0)208 740 4200

Always de-energize unit before removing cover. The installation of the units must be in accordance with any local codes that may apply and should only be carried out by a competent trained electrical engineer. The power terminals on the control unit are clearly marked and will accept up to 1.5mm² cable.

The AL105N units will have the beacon already prewired to the unit so no extra wiring is required.

4) Beacon Set-up

The beacon unit may need to be configured dependant on the type of flash required.

The xenon beacon has a 1Hz flash rate only.

The LED beacon is set as standard to the 2Hz flash mode but it can be set to a steady on mode also. To alter the settings, change the position of the header pin as shown.

- Remove header for steady mode.
- Keep header in standard position for 2Hz flashing mode

5) Unit Set-up and Recording

The unit will need to be configured to suit the end user.

If recording either via the onboard microphone or the in-line connector the unit will need to be supplied with power.

DC units can be powered when completing recording and set-up.

Warning! : During set-up AC units must be temporarily powered from either a 12V battery or a separate 10-30VDC isolated power supply, connected directly to the DC terminals on the main appello PCB. This is because the AC units power supply is not isolated and there may be a risk of electric shock.

See section 7) Appello Setup Guide overleaf for Set-up instructions and functions.

6) Tone Selection Table

The Appello unit has 45 different tones (See Table 1) that can be selected for the first stage alarm. The systems can then be switched to sound second, third and fourth stage alarm tones. The tones are selected by operation of a DIP switch S4 on the main PCB.

The tone table (Table 1) shows the switch positions for the 45 tones and which tones are available for the second third and fourth stages.

Example

S4 Dip Switch - Shown Set for Tone 1
(All switches OFF)

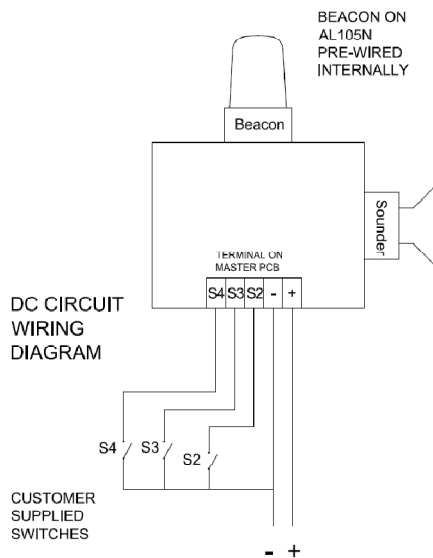

To sound stage one simply connect the supply voltage (+ve and -ve) for DC units and (L, N, E) for AC units, to the supply input terminals on the correct PCB shown.

DC Units Second, Third and Fourth Stage Selection

The Appello unit uses –ve switching to change the tone to the second, third and fourth stages.

Warning! : The negative supply must remain connected to the -(ve) terminal and a link made from this to the appropriate stage (S2) terminal otherwise the unit will be damaged.

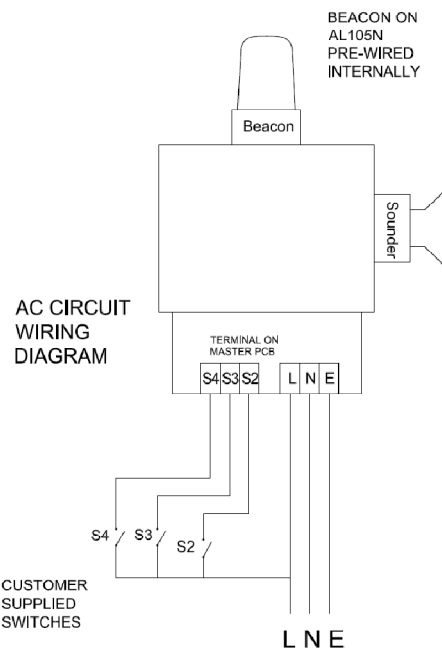

To change to the second, third or fourth stage tone, link the -ve supply line to terminal relevant stage terminal. I.e. for Stage 2 link the -ve supply to the S2 terminal, for Stage 3 link the -ve supply to the S3 terminal etc.

AC Units Second, Third and Fourth Stage Selection

The Appello unit uses Live switching to change the tone to the second, third and fourth stages.

To change to the second, third or fourth stage tone, whilst maintaining the ac supply to the Live and neutral, also link the Live supply line to terminal relevant stage terminal. I.e. for Stage 2 link the Live supply to the S2 terminal, for Stage 3 link the Live supply to the S3 terminal etc.

7) Appello Setup Guide

The following guide is designed to get the user quickly interfacing with the Appello unit.

- The Appello unit can be set-up to either play an attention seeking tone and then a recorded message or just play the recorded message.
- The user can:
 - Record on each of the 4 stages using either the Line In or Microphone inputs
 - Select the required alarm tone
 - Delete unwanted messages.
- To re-record a message on a particular stage, the previous message on that stage must be deleted first.
- Once the user has configured the unit, it must be put into its Playback Mode and S2 switches set to stage 1, as shown in Quick Ref - Playback Mode (Stage 1 illustrated) guide below.
- The "Mass Erase" function will erase all the recorded stages.
- **The "Mass Erase" can also be used to reset the unit if any functionality is lost.**

Quick ref - Switch 'S2' Dip Switch Function Settings

Switch No.	OFF Position Function		ON Position Function
1	Record Mode		Playback Mode
2	Stage selection switch		Switch 2 On & Switch 3 On = Alarm Stage 1 Switch 2 Off & Switch 3 On = Alarm Stage 2 Switch 2 On & Switch 3 Off = Alarm Stage 3 Switch 2 Off & Switch 3 Off = Alarm Stage 4
3	Stage selection switch		
4	Line-In selected		On board Microphone selected
5	Program – Record & Erase Mode ON		Playback – Record & Erase Mode OFF
6	Message & Tone Playback		Message only Playback
7	Single Message or Mass Erase Mode OFF		Single Message or Mass Erase Mode ON
