

Cordless MouseMan® Optical

**Cordless freedom
on any surface**

Logitech® Cordless MouseMan® Optical is everything you want in a mouse: cordless, precise and comfortable. Logitech, the creator of the cordless mouse, combines digital radio technology and exclusive Agilent optical technology to give you the greatest accuracy in a hand-fitted design for the ultimate mouse.

Cordless Technology Frees Your Space

No more cord to get tangled or caught. Just plug the cordless receiver into your system, within 6 feet of the mouse, and you can move about the desktop with complete freedom. The digital radio technology doesn't require line of sight. This mouse performs on crowded desktops where cups, piles of papers and books come between it and the computer. Plus, digital security IDs lock out interference and make the receiver listen to only one mouse, enabling the use of multiple mice in an office environment.

Optical Accuracy and Precision

Logitech® worked with Agilent Technologies to create an exclusive low-power sensor for Cordless MouseMan® Optical. Not only do you

get maximum battery life from your mouse, Cordless MouseMan® Optical is the first to have an 800 dpi sensor, which means twice as much accuracy on any surface. No need to wipe away dust or crumbs, and no mousepad required. This mouse provides precise tracking no matter what you do. Optical mice have a tracking system that works through light which means that there are no moving parts, greater durability and less cleaning than ball-based mice.

Smart Management Keeps You Working

With the low-power optical sensor, Cordless MouseMan Optical keeps working uninterrupted for three months. The mouse has four modes, visible by the optical LED, that ensure it regulates power usage when not in use. There are two standard AA batteries included in the package. Logitech's MouseWare® software includes a battery status indicator, which will give advanced warning to change the batteries before they run out.

Cordless MouseMan® Optical

Cordless freedom on any surface

Designed for Comfort and Performance

Put your right hand on the mouse and rest comfortably on the contoured shape. Using the latest materials, Cordless MouseMan® Optical has been designed with your hand in mind, including a useful fourth button that rests under your thumb. The scroll wheel can help you navigate documents and the web faster and easier. Use the scroll wheel and there's no need for scroll bars, or press the scroll button to activate WebWheel™ which lets you jump to your favorite web sites without closing the application you are using.

Easy Connections

Just plug the compact receiver into the USB or PS/2 port on your computer. This receiver lets your mouse "talk" to the computer. Plug it in, hide it behind your computer, or set it off your desk, and forget about it. Install the Logitech® MouseWare® to take advantage of the shortcuts and power management features.

Quality You Can Rely On

This mouse is made with the uncompromising quality of Logitech, the leading maker of cordless and corded mice. The Logitech® Cordless MouseMan® Optical includes a five-year warranty, a guarantee you can trust from a company that has sold over 10 million cordless mice.
