

New from

Weller®

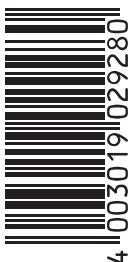

Power Station WSD 150

The soldering station WSD 150 was specially developed for soldering tasks with an extremely high heat requirement. The special 150 W soldering iron has a high performance capability combined with an easy to use shape and a fast warm-up time. The temperature for the WSP 150 soldering iron can be set over the range from 50°C to 550°C via two buttons. As an alternative nearly all Weller soldering tools can be connected to the unit. The digital electronic control system recognizes automatically the tools and provides the best possible control performance. With the optional input units WCB 1 and WCB 2 it is possible to implement time functions, locking functions etc.

Technical Data WSD 150:

Dimensions (l x w x h): 166 mm x 115 mm x 101 mm
 Temperature control: 50°C - 550°C (only WSP 150, others 450°C)
 Power Input: 160 W
 Protection class: 1 (control unit) and 3 (soldering iron)
