Suitable for deburring holes 1.5mm or larger

Packed Weight and Dimensions:

Weight g	W mm	H mm	L mm
71	80	25	225

Instructions for successful deburring

Do not use heavy pressure when deburring as this will cause the blade to dig into the material and give an uneven finish

Use light and even pressure which will allow the blade and handle to work together to remove the burr and leave a smooth finish on the component

Safety Information

Blades should be handled carefully as they are sharp and can cut

Blades can break causing flying objects

Sharp edges and flying objects can cause injury

Users and bystanders should wear protective safety glasses

Do not pry or bend blades

Keep blades and sharp tools away from children

Do not regrind blades as this will weaken the blade and cause breakage and possible injury

General Information

How to use:

1. Rotate colored sleeve to OPEN, pull blade out and insert a new blade.

2. Turn sleeve to LOCK.

EO Handle with green sleeve fitted with S10 Blade
Suitable for deburring Brass and Cast Iron
