

USE YOUR EXISTING 18V LI-ION MAKITA BATTERIES TO POWER THESE 36V MACHINES

2x 18v Batteries will power the 36v DC motor. The 36v DC motor delivers more power and run time without leaving the 18v Lithium-ion platform.

When different capacity batteries are used together (for example, 4.0Ah BL1840 and 3.0Ah BL1830, or fully charged BL1830 and 70% charged BL1830), the machine stops when the battery with least capacity is empty.
