RS Pro Lubricant 200 ml aerosol

Product Details

Contact Treatment Products - RS

Contact Treatment Oil - Fluid Pen

A moulded pen containing treatment oil which, by using the nozzle spout, can be accurately placed into switches, relays etc.

The pen can be held in a pocket or an engineer's case by using the clip attached.

Contact Treatment Grease - Syringe

A solid grease containing no diluents for bulk application on to heavy current terminals, battery posts, sliding contacts and vertical surfaces.

Available in a 20 ml syringe with hand plunger or a 35 ml syringe only compatible with precision liquid dispensers using 'Techcon' type consumables.

Cleaning Strips

Cleaning strips impregnated with synthetic oil intended to loosen tarnish on edge connectors and contacts whilst applying a protective film.

The strips are rubbed on to the areas where treatment is required.

Strips are supplied 15 to a card, each 75 x 10 mm
