

BELKIN.

OmniView Dual-Port USB KVM Cable, 3.6m

The OmniView Dual-Port USB KVM Cable provides you with the proper connection between your USB computer and your Quad-Bus KVM Switch, up to 3.6m (12 feet) apart.

The OmniView™ ENTERPRISE Series Dual-Port USB KVM Cable provides you with the proper connection between your USB computer and your ENTERPRISE Series KVM Switch, up to 3.6m (12 feet) apart. Belkin OmniView ENTERPRISE Series Dual-Port USB KVM Cables provide maximum connectivity between your USB servers and OmniView ENTERPRISE KVM Switches. Our coaxial video cabling preserves video strength and clarity at higher resolutions, and the dual-port design delivers built-in cable management for your convenience.

Available in 1.8m and 3.6m (6- and 12-foot) lengths, this Dual-Port USB Cable works with OmniView ENTERPRISE Series KVM Switches.

Benefits

- Preserves signal integrity at higher resolutions with coaxial VGA cabling
- Adds durable strength with Tactilite™ molded-strain relief construction
- Features exclusive, 360-degree turning radius for flexibility even under extreme conditions
- Protects against damage to conductors
- Installs easily with modified slender thumbscrews
- Reduces electromagnetic and radio frequency interference (EMI/RFI)
- Comes with a Belkin Lifetime Warranty
- Aluminum undermold shield for EMI/RFI reduction
- Double-shielded (braid-and-foil) construction
- PC99 color-coded connectors for easy port identification and installation
- In 1.8m and 3.6m (6- and 12-foot) lengths
