Security Alarm Door & Window Switches

Roller Shutter Proximity Switch

[RS Stock No. 625-671](#)

Description:

The roller shutter contact was primarily designed for the protection of the roller shutter doors and garage type up and over doors. The construction and profile of the switch enables it to be bolted to the floor and may be driven over with a vehicle, the magnet is fixed to the door. The switch and magnet units are housed in robust die cast aluminium cases.
