

TECHNICAL DATA SHEET

RS 557-073 **Copper-Based Anti-Seize Compound**

Copper-based anti-seize compound for lubricating and preventing seizure between metal surfaces when applied before assembly.

- Protects against extremes of temperature and environmental attack
- Pure copper base ensures long life
- Lowers friction - reduces tool wear and thereby reduces maintenance costs

Typical Properties

Colour	Copper
Density (g/ml)	1.12
Evaporation Weight Loss (% 7 days @ 125°C)	22%

Directions for Use

Apply via syringe. General maintenance product, suitable for use between metal interfaces where seizure may be a concern.
