Datasheet

PVC 5m Long Black Flexible Ducting Reinforced, 100mm Bend Radius , Applications Various

RS Stock number 3400065

Features

High Temperature Ducting

PVC coated steel spiral helix embedded between two layers of thermoplastic, heat resistant, alcryn rubber

Temperature: -25°C to + 125°C

High resistance to acid and oil fumes, ozone, sunlight, aging and oxidation

Good resistance to high and low temperatures, fatigue and vibration

Suitable for automotive air intakes and general purpose air and fume extraction .Self extinguishing

Note

All data refers to performance at 18°C. Any change in temperature will affect the performance data
