

## Guidance Note 4: Protection Against Fire, 7<sup>th</sup> Edition

7<sup>th</sup> Edition

Protection against fire is a key element of Amendment No. 3 to the 17<sup>th</sup> Edition. Vital changes are expected to vastly improve the safety of contractors, consumers and fire services. **Guidance Note 4: Protection Against Fire** provides clear guidance on how to apply the updated aspects of BS 7671.

These changes affect all those working on installations. Ensure the safety of yourself and others by following the new guidance.

Amendment No. 3 publishes on 5 January 2015 and comes into effect on 1 July 2015. All new installations from this point must comply with Amendment No. 3 to BS 7671:2008.

Expected changes include information on:

- Wiring in escape routes
- Consumer units (to come into effect January 2016)
- Heating equipment

### READERSHIP

Everyone involved with fire safety in electrical installations, including consulting engineers, electricians, electrical installers, inspectors and technicians.
