

Part Number : TDGL005 - chipKIT Basic I/O Shield

The chipKIT Basic I/O Shield adds a variety of useful I/O devices to the chipKIT Uno32 or the chipKIT Max32. It provides simple I/O such as buttons, switches and LEDs, as well as more complex devices such as an I2C EEPROM, an I2C temperature sensor, and a 128x32 pixel organic LED graphic display.

- 128x32 OLED Graphic Display
- Digital temperature sensor
- 256kbit EEPROM
- 4 switches
- 4 push buttons
- 8 LEDs
- 4 Open drain transistor outputs
- Analog potentiometer

Note: Requires chipKIT Uno32 (TDGL002) or chipKIT Max32 (TDGL003).
