## RS Pro EDP ARM Programming/Debug Module

RS Stock No: **703-9241**

### Product Details

RS Pro EDP ARM debug module is a plug in module developed for programming and debugging flash memory. This module provides support for JTAG debug on the classic ARM7 (EDP-CM-LPC2368), ARM9 (EDP-CM-STR912) and Cortex-M0 (EDP-CM-LPC1113) devices whilst also providing SWD debugging for the later Cortex M3 variants (EDP-CM-LPC1768/1343). The module has mini-USB connector for PC link. This plug in EDP debug module works with Keil uVision 4 development environment.

### Features and Benefits

- Mini-USB connector for PC link
- Works with Keil uVision 4 development environment
- Plug in module for programming and debugging Flash memory
- support for JTAG debug

ENGLISH

### Specifications:

Classification	Accessory
Name	EDP ARM Debug Module
Technology	EDP
