

Adjustable Wirewound Vitreous Resistors Low Ohmic Values (0.10 Ω available)

CS collars

FEATURES

- High power rating: 16 W to 600 W at 25 °C
- Heavy overloads 10 Pn 15 s $\leq$ 1 %
- Low ohmic values 0.10 Ω available
- High long term stability drift < 1.5 % after 1000 h
- Excellent withstanding of thermal shock
- Mechanical strength
- Fire proof

RoHS
COMPLIANT

RSSD medium and high power resistors are noted for their ability to withstand heavy transient and severe shock and vibration conditions. They complement the ohmic range of Vishay styles RW, RWST and RA in the low value area, and can be tapped by means of adjustable collars. Standard RSSD resistors have a single adjustable collar.

ADDITIONAL TAPPINGS

Are supplied with their adjustable collars fastened but not set to any specific value. Please note that, on request, all tapings can be adjusted by VISHAY SFERNICE. For adjustment purposes we would need to be advised of the ohmic values, and tolerances of the sections in successive order in addition to their sum R_n .

The permissible maximum value for an adjustment should take into account the possible negative tolerance of R_n .

Please consult VISHAY SFERNICE regarding the acceptable tolerance.

RECOMMENDATIONS FOR USE**Maximum Current Strength:**

The ohmic value and the power decrease as the connections are brought together. To avoid overload, the maximum current strength that is permissible for R_n should never be exceeded:

$$I_{\max} = \sqrt{Pr/R_n}$$
