# 30 Piece Socket/Spanner Set

RS Stock number [157-1632](#)

### Features:

A 30-piece socket/spanner set, equivalent to an 88 piece traditional set. Manufactured from high quality chrome vanadium steel, all sockets conform to DIN 3124, ratchets and accessories to DIN 3122 and 3123. All tools have a bright polished finish  
 Metrinch® tools are designed to drive on the hexagon flats, not the corners. This enables one tool to drive metric/AF in. BSW and BSF hexagons. This unique drive system also makes these tools particularly useful for use on old or rounded-off hexagon nuts or bolts  
 This set is supplied complete in a strong/robust polypropylene storage case
