

# ATPL21SFLT-99

ATPL21SFLT-99 PRIME Sniffer Lite is a tool used to analyze Power Line Communications compliant with the PRIME specification. The acquired samples are sent in real time to a PC based monitoring application through USB interface. The PRIME Sniffer Lite tool itself comprises a sniffing probe with PC USB interface, connection interface to 220/110VAC mains and oscilloscope signal output connector, as well as a PC application to visualize and analyze the acquired traffic samples.

## Key Features

- **Complies with PRIME 1.3E specification**
- **Includes PC application to visualize, analyze and filter the received PRIME frames.**
- **USB interface**
- **Activity LEDs**
- **Signal output connector for oscilloscope**
- **Dimensions: 130 x 55 x 25 mm**
