

MP3 compatible annunciator with LED Signal Tower

105dB at 1m*

MP3 (LKEH-FV)

32 Sounds (LKEH-F□)

IP53

NPN
Open Collector

*Actual sound level may vary depending on sound type.

Get the attention you need with PATLITE's Field Programmable LKEH series signal tower with audible alarm hybrid unit.

- Visible from great distance with ultra bright LEDs and 100mm diameter lens.
- Safe for use at high vibration environment with robust 2G vibration resistant design.
- Easy to control with only one common wire for both LEDs and audible signals.
- CE, RoHS, IP53, (UL, c-UL pending).
- Field programmable with SD card. (Sold separately) (LKEH-FV)
Message capacity is up to 64 seconds (64kbit/s) with 5 channels by a bit input and 31 channels by binary input.
- Volume is adjustable from 0 to 105dB (at 1m) to fit various environments.
- Smooth LED lens surface.

Available by Special Order

- PNP open collector transistor type.

Optional Parts

Wall mount bracket SZ-023

Bracket: steel (powder coating)
Bracket cover: AES resin

Voice Synthesizer (LKEH-FV)

- Total recording time of up to 64 seconds (64kbit/s) can be divided up to 5 channels with a bit input, or 31 channels with binary input.

32 sounds are pre-recorded in one unit (LKEH-FA/FC/FD/FE)

- 32 sounds are pre-recorded in one unit. 4 sound types are available.
- 8 sounds can be played back by a bit input, and 32 sounds by binary input.

Type A

Beep (slow intermittent horn)	Stutter (rapid intermittent horn)	Bell (clear high pitched bell)	Yelp (rapid siren)
Rapid Hi-Lo	Melody Chime	Synthesized Piano	Synthesized Bell
Stutter (rapid intermittent horn) Bell (clear high pitched bell)	Synthesized Melody Chime	Chime	Call sign
Fur Elise	Maiden's Prayer	Minuet	Annie Laurie
London Bridge is Falling Down	Holdiridia	Mary Had a Little Lamb	Camptown Races
Kuck kuck	Der Schmied im Walde	On the Bridge of Avignon	Daydream Believer
Amaryllis	Mozart Symphony No. 40	Itsy Bitsy Spider	Ich bin ein Musikante
Jeux Interdits	Katuscha	Grandfather's Clock	Ave Maria

Type D

Beep (slow intermittent horn)	Stutter (rapid intermittent horn)	Bell (clear high pitched bell)	Yelp (rapid siren)
Rapid Hi-Lo	Melody Chime	Synthesized Piano	Synthesized Bell
Runner	Mamotte Agetai	Chime	Call sign
Oribiao Kikinagara	A September	Doyoubino Koibito	Akino Kehai
Saafu Tengoku Sukii Tengoku	Iro Howaitoburendo	Happy Birthday	Hi Ho
I've been working on the Railroad	Bear Song	Toys Go Cha Cha Cha	Konnako Irukana
Wiegenlied	Rudolph the Red-nosed Reindeer	She Wore a Yellow Ribbon	Oh My Darling Clementine
Yellow Rose of Texas	Yankee Doodle	When the Saints Go Marching In	Londonderry Air

PATLITE Corporation has not applied for permission to use certain copyrighted music or songs recorded in LKEH-FA, FC and FD types outside of Japan; therefore, please contact the local copyright association for permission before using the product in case this product is used outside of Japan. LKEH-FE type is recommended for use outside of Japan as this model does not include copyrighted music or songs, and the permission is not require.

Type C

Beep (slow intermittent horn)	Stutter (rapid intermittent horn)	Bell (clear high pitched bell)	Yelp (rapid siren)
Rapid Hi-Lo	Melody Chime	Synthesized Piano	Synthesized Bell
Stutter (rapid intermittent horn) Bell (clear high pitched bell)	Synthesized Melody Chime	Chime	Call sign
Can't Take My Eyes off of You	Top of the World	The Entertainer	Amazing Grace
Amairono Kamino Otome	Les Champs-Elysees	Canon	Rara Sanshain
Uchuusenkan Yamato	Oshiete	Makenaide	Gonna Fly Now (Theme for 'Rocky')
I Don't Want to Miss a Thing	Yozorano Mukou	Aiwa Katsu	Haruyo Koi
Gattsudaze	Odoru Ponpokorin	Imasugu Kisu Mi	Truth

Type E

Beep (slow intermittent horn)	Stutter (rapid intermittent horn)	Inverted Receille	Annie Laurie
Stutter (rapid intermittent horn)	Synthesized Melody Chime	Galactic Motor	London Bridge is Falling Down
Bell (clear high pitched bell)	Chime	Ringin Phone	Mary Had a Little Lamb
Yelp (rapid siren)	Call Sign	Two Tone	Camptown Races
Rapid Hi-Lo	Train Ride	Alarm Clock	Amaryllis
Melody Chime	Galloping Hi-Lo	Ringin Hi-Lo	Mozart Symphony No.40
Synthesized Piano	Alien Chatter	Fur Elise	Ave Maria
Synthesized Bell	Falling Crystals	Minuet in G	Grandfather's Clock

Audible Alarm with LED Signal Light

Instruction Manual

[TYPE:LKEH]

Thank you very much for purchasing the **Audible Alarm with LED Signal Light**.

Before use, please read this Instruction Manual thoroughly and use the product correctly. In addition, keep this manual in a safe place.

When carrying out maintenance/check, repair etc., be sure to reread this manual.

If an unclear point arises, please inquire to each sales office or technical consultation service written in the last page.

● Safety Precautions

In order to prevent harm on users or other persons and damage on properties, the matters to be kept without fail are explained as follows.

- The degree of harm and damage that will occur when misuse is made by ignoring the contents of indication is classified and explained by the following indications.

WARNING

The column with this indication shows the contents in which "possibility of death or being seriously injured is assumed."

CAUTION

The column with this indication shows the contents in which "possibility of being injured or only occurrence of property damage is assumed."

1 Matters to be kept without fail for Safety Purpose

WARNING

- At the wiring and mounting of products, be sure to cut off power source. There is a risk of electrical shock.
- Do not disassemble or modify the product. There is a risk of fire, electrical shock etc. For repair, check etc of inside the product, please inquire to each sales office or technical consultation service written in the last page.
- Pay attention not to mistake wiring work. If wiring is mistaken, the internal circuit may burn out and it will become a cause of fire.
- Be sure to use the power supply within the allowable voltage range of the product. Otherwise, it may become a cause of fire and/or failure.
- For the installation with execution of work, be sure to ask a professional company. Otherwise, there is a risk of electrical shock, fire and/or falling etc.
- If it is used outside, be sure to perform insulation treatment at the connection part of cables. Otherwise, there is a risk of failure or electric shock.

CAUTION

- Be sure to connect the outside fuse for protection of the power supply circuit and internal circuit of the main body.
- Do not leave or use it under the condition in which the LED light unit and/or head cover are detached. Or else, it may become a cause of failure.

The trouble occurred due to mishandling against the warning and caution matters, and/or due to disassembling, modification, natural disaster etc. cannot be guaranteed. Further, avoid the usage under conditions other than the contents described in this manual.

Request

- Use it in the environment where strong radio waves and/or inductive noise do not exist. Otherwise, there is a risk of noise generation from the horn.
- Use it in the environment where corrosive gas does not exist. Otherwise, it will become a cause of failure.
- In order to avoid electrostatic breakdown, start to work after discharging static electricity which is charged on a human body.
By touching an earthed metallic part with a bare hand, static electricity can be discharged.
- Perform fitting of each part at a recommended torque value.
- Pay attention not to lose the parts such as the hand screw, front covers etc. which are to be detached at performing work.
- If this product is used for the safety-sensitive security purpose, be sure to perform daily check, and establish the system design that can cope with the occurrence of accidental trouble and failure.
- Do not use it at the place where vibration exists that is exceeding the specification. There is a risk of damage and/or falling of the main body.

PATLITE Corporation has not applied for permission to use certain copyrighted music or songs recorded in LKEH-FA, FC and FD types outside of Japan; therefore, please contact the local copyright association for permission before using the product in case this product is used outside of Japan.

LKEH-FE type is recommended for use outside of Japan as this model does not include copyrighted music or songs, and the permission is not required.

2 Indication Method of Models

L K E H - 4 0 2 F A P U L - R Y G B ^{*3)}

- Number of stacks
1: One stack
2: Two stacks
3: Three stacks
4: Four stacks
- Rated voltage
02: 24V DC
10: 100V AC
12: 120V AC
20: 220V AC
- Sound type
A: Type A
C: Type C
D: Type D
E: Type E
- Connectable transistor
None: NPN type
P: PNP type ^{*1)}
- Standard ^{*2)}
UL: UL standard
- Unit color of the LED light unit ^{*3)}
R: Red
Y: Yellow
G: Green
B: Blue
C: White

^{*1)} PNP type is custom made product. Regarding the model number, please inquire to each sales office or technical consultation service.

^{*2)} UL certification product is only model of 24V DC.

^{*3)} In the case of model indication shown at the left column, the coloration of a LED light unit is in the order of red, yellow, green and blue, from the upper stack.

3 Designation of Each Part

4 Fitting Method

Perform fitting work in accordance with the following procedure.

- (1) Confirm that a space of more than outline dimensions of the product is kept on the fitting face (plate thickness: 1 to 10mm), and perform drilling of the fitting holes. (Refer to the dimensional drawing for fitting.)
- (2) Insert the product from the fitting face. Then, fit the nuts as the accessory in the order of the washers, spring washers, nuts, and tighten them. (Recommended tightening torque: 0.7N•m)
- (3) Confirm that the product and the nuts are correctly fitted.

⚠ WARNING

- When fitting the product, be sure to cut off power supply. Otherwise, there is a risk of electrical shock.
- For the installation with execution of work, be sure to ask a professional company. Otherwise, there is a risk of electrical shock, fire and/or falling etc.

⚠ CAUTION

- For the fitting face, keep sufficient strength that can bear the weight of the product. Further, do not use it at the place where vibration exists that is exceeding the specification. Or else, there is a risk of injury due to falling of the product, and/or damage of the product.
- Use all the set of attached nuts, and fix them with recommended torques. Otherwise, there is a risk of injury due to falling of the product, and/or damage of the product.
- For the direction of fitting, it shall be fitted in the vertical forward direction. Do not fit it at the lateral direction or inverse direction. Or else, there is a risk of falling of the product.
- If it is used at the place where water may be poured, a hitting angle of water shall be 60° or less from the vertical direction. Otherwise, there is a risk of failure due to water ingress.
- The model (Type:LKEH-F□UL) to comply UL Standard shall be used indoors, and shall not be used at wet location.
- The model to comply UL Standard shall be used on a flat surface of a Type 1 Enclosure.

Request

- The product shall be fitted at a plane without concavity and convexity. Otherwise, water proofness and dust proofness of the product will decrease.
- At the place where vibration is generated, perform periodical check of tightening condition of fitting nuts, and application of screw-lock agent etc., in order to prevent the product from falling.
- When mounting it at a high place, choose the place where a foothold exists for facilitating repair work.
- If it is used under the connected state to the power supply, then provide a switch which can easily cut off power supply in proximity to the main body, for the safety purpose.

5 Wiring Method

[In case of NPN transistor type (Type: LKEH-F□)]

- For the outside contact of the signal line, use the no-voltage contact circuit such as relays, switches etc., or the open collector circuit (NPN type).

Regarding the capacity of the circuit & contacts, refer to the table at the right side.

No-voltage contact circuit			
Optical signal line		Sound signal line	
Outside contact	90mA	Outside contact	6mA
24V		24V	
*6		*6	
Common line		Common line	
NPN open collector circuit			
Optical signal line		Sound signal line	
Outside contact	90mA	Outside contact	6mA
24V		24V	
*6		*6	
Common line		Common line	
*1. Blinking control is not applicable.			
Capacity of contact			
Optical signal line		Sound signal line	
Current capacity: 100mA or more *3		Current capacity: 6mA or more	
Withstand voltage: 30V DC or more		Withstand voltage: 30V DC or more	
Leakage current: 0.1mA or less		Leakage current: 0.1mA or less	
ON voltage (sat): 1V or less		ON voltage (sat): 1V or less	

Model	Rated voltage	Rush current *4	Fuse capacity *5
LKEH-□02	24V DC	10A	2A(Normal)
LKEH-□10	100V AC	12A	0.5A(Time lag)
LKEH-□12	120V AC	12A	0.5A(Time lag)
LKEH-□20	220V AC	6A	0.5A(Normal)

*** Do not apply voltage on each signal line.
Or else, there is a risk of breaking down the product.**

[In case of PNP transistor type (Type: LKEH-F□P)]

- For the outside contact of the signal line, use the PNP transistor. But, PNP type is not applicable for blinking control. Regarding the capacity of the circuit & contacts, refer to the table at the right side.

PNP open collector circuit			
Optical signal line		Sound signal line	
Outside contact	90mA	Outside contact	6mA
LKEH		LKEH	
Optical signal line		Sound signal line	
24V *6		24V *6	
Common line		Common line	
*1. Blinking control is not applicable.			
Capacity of contact			
Optical signal line		Sound signal line	
Current capacity: 100mA or more *3		Current capacity: 6mA or more	
Withstand voltage: 30V DC or more		Withstand voltage: 30V DC or more	
Leakage current: 0.1mA or less		Leakage current: 0.1mA or less	
ON voltage (sat): 1V or less		ON voltage (sat): 1V or less	

Model	Rated voltage	Rush current *4	Fuse capacity *5
LKEH-□02	24V DC	10A	2A(Normal)
LKEH-□10	100V AC	12A	0.5A(Time lag)
LKEH-□12	120V AC	12A	0.5A(Time lag)
LKEH-□20	220V AC	6A	0.5A(Normal)

- *1. Blinking control is applicable only for the no-voltage contact circuit.
- *2. For the LKEH-□02(P), connect the Power supply line (Black) to the - terminal. And, for the LKEH-□02UL (UL Standard), connect to Class 2 power supply.
- *3. Current capacity of the contact per one stack of the LED light unit.
When using a plurality of LED light units with a same color, confirm the contents of following (Request).
- *4. At the maximum using voltage, and when power supply is switched on.
- *5. For LKEH-□10/12, use a fuse of the time-lag type. If the normal type is used, there is a risk of melting down by rush current.
- *6. In case of LKEH-□02(P), this shows the power supply voltage.

⚠ WARNING

- When carrying out wiring, be sure to cut off power supply. Otherwise, there is a risk of electrical shock.
- Pay attention not to make a mistake at wiring. Or else, the internal circuit may be burnt, and it may become a cause of fire.

⚠ CAUTION

- For protection of the power circuit and internal circuit of the main body, be sure to use the outside fuse with recommended capacity.

Request

- When using a plurality of units with a same color, current capacity of the contact becomes "Number of the units with a same color × current capacity of the contact per one stack," because all units with the same color are illuminated via one signal line. Select the relay which satisfies the current capacity of the contact when used. (Example) In the case of a four-stack red LED light unit, current capacity of the contact becomes:
4 (stacks) × 100 (mA) = 400mA
- Before switching on the power supply, confirm that the wiring is correctly performed.
- For countermeasure of noise, it is recommended to perform wiring as short as possible, and to use shielded wires. In addition, if a signal line is passing along high voltage cables or its wiring is located at the place likely to receive induction noise, there is a risk of malfunction by the effect of noise.

- If a no-voltage contact such as a relay or a switch etc. is used for power supply line, select the contact for which rush current is considered. If capacity is insufficient, it will become a cause of welding (deposition) of the contact and/or malfunction.
- After wiring, insulating treatment shall be made on respective tips of the signal lines that are not used. Otherwise, it will become a cause of malfunction.
- If the signal line is used along with each signal line of the product other than this product, do not connect each signal line, as well as each common line.
(Since the voltage applied on each signal line is different, the circuit will fail.)
Be sure to use switches and relays for two circuits and divide the contacts.
- Do not short-circuit the sound/sound reduction signal line and the blinking common line. Or else, the tone cannot be played normally.
- Do not connect the common line and the blinking common line. Or else, the LED light unit cannot blink normally.
- If a plurality of these products are used, do not connect the respective signal lines of the plural units to the one and same contact. Or else, current is generated between each product and it will become a cause of malfunction. Be sure to use switches and relays for two circuits and divide the contacts.

Notification

- If power supply or signal lines are switched on simultaneously at the use of plural units, a shift of playing the tone/blinking period will occur.

6 Setting Method

6-1. Opening and closing of the front cover

When carrying out the selection switch manipulation, sound volume adjustment, and change of tone combination, execute opening and closing of the front cover according to the following procedure.

- (1) Detach the hand screw.
- (2) Detach the front cover.
- (3) After finishing the work, fit the parts which were detached at (1) and (2), in the reverse procedure. (Recommended tightening torque of the hand screw: 0.07N•m)

Request

- After finishing the work, be sure to operate the product on the condition that the front cover is fitted. Otherwise, water and dust will enter, and it will become a cause of failure.
- Fit the hand screw with the recommended tightening torque. If the torque is lower than the recommended value, water proofness and dust proofness will decrease.
- Do not forcibly draw out the front cover. Or else, there is a risk of damage.

6-2. Adjustment of sound volume

Adjustment of sound volume is possible by means of the volume (knob).

Request

- Turn the volume (knob) lightly. If a torque exceeding 0.2N•m is applied, there is a risk of damage. Further, do not apply shock, or do not pull out.

Notification

- If sound volume is increased, sound cracking may occur depending on a tone.
- Even if the volume is set at the minimum level, the sound condition may not become silent, depending on the environment of usage.

6-3. Selection switch

Selection of the following functions is possible.

- Selection of a tone group (switches 1 to 3)

It is possible to select a tone group among the groups A to H. For the tone groups, refer to the List of the Tones in the following page. By bit input, a tone is played which corresponds to the list of group and channel setting. Regarding the operation, refer to "7. How to Use." In addition, tones can be freely combined by utilizing a SD card in the case of the group H. Refer to "6-4. Combination method of the tones."

- Test playing (switch 5)

By setting to ON, the CH1 in the selected tone group is played. So, use it for confirming operation and at sound volume adjustment. By setting to OFF, playing of the tone is stopped.

- Switching of the input mode (switch 6)

It is used for setting the input method (bit input or binary input) of the sound signal line. By setting to OFF, the bit input mode is selected, and CH1 to CH8 of the sound signal line are set to bit input. By setting to ON, the binary input mode is selected, and CH1 to CH6 of the sound signal line are set to binary input.

Request

- Manipulate the selection switches by means of tools such as tweezers etc.
- Do not handle the selection switches with excessive force. There is a risk of breaking the selection switches.

Notification

- The selection switch 4 is not used. Further, even if setting of the selection switch 4 is changed, it does not affect operation of the product.
- When a sound signal line is selected, the corresponding tone is played by priority, even if the test playing switch is set to ON.

★List of the Tones

- Tone type A (Model: LKEH-□A)

6-4. Combination method of the tones

In the case of the group H, tones can be freely combined among 32 tones, by utilizing a SD card.

- Articles to be prepared: SD card (Model SDV-128P, separate vending), personal computer, Reader/writer for SD cards.

6-4-1. Preparation of tone combination data

Tone combination data are prepared by using a personal computer.

- (1) Connect a personal computer and a reader/writer for SD cards. Then, insert a SD card.

- (2) From the "My Computer" of the personal computer, open the drive in which the SD card is inserted.

- (3) Click a mouse with a right hand on the opened window, and select the "Text document" from the "New document."

* The name may differ by the version of OS (operating system), such as "Memo," for example.

- (4) Change the file name of the prepared document into [oto-list.txt].

* Input the file name with the half-width character of capital letters or lower cases (small letters). At preparation of a text document, if the file name is not designated as '.txt', then designate the file name as [oto-list].

- (5) Input the tone numbers to be combined (refer to the List of the Tones in "6-3. Selection switch") in the text document prepared at (4), and store it in the SD card. Carry out assignment of a tone number with half-width character of double digits (in the case of a tone number "1," it shall be "01"), and be sure to input 16 digits.

If it is less than 16 digits, a writing error occurs.

☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Tone No. of CH1	Tone No. of CH2	Tone No. of CH3	Tone No. of CH4	Tone No. of CH5	Tone No. of CH6	Tone No. of CH7	Tone No. of CH8									

■ Example of preparation

In the case of preparing the following combination at the tone type A:

CH1. Beep(slow intermittent horn) CH2. Amaryllis CH3. Synthesized Piano
CH4. Grandfather's Clock CH5. The camptown Races CH6. Shutter
CH7. Cuckoo CH8. Mary had a little Lamb

Input the number [0125073120022119] in the text file, and store the file.

6-4-2. Transfer of tone combination data

Transfer the tone combination data prepared at the "6-4-1. Preparation of tone combination data" to this product.

(1) Open the front cover. (Refer to the "6-1. Opening and closing of the front cover.")

(2) By inserting the SD card in which the data was written at the "6-4-1. Preparation of tone combination data" into the card slot, data transfer is started.

(3) When data transfer has finished, it is informed by the sound "Pee."
Then pull out the SD card.

* Writing will be completed within 1 second. If it is informed by the sound "Pipipipi" or there is no reaction, the data transfer is not normally completed.

Confirm the contents of data and operation procedure.

In addition, pay attention that, if the volume is at the minimum level, the informing sound cannot be heard.

(4) Adjust the tone group selection switch to H, and confirm the tone of each CH.

*Take care for the inserting direction.

Request

- For the SD card, use the model SDV-128P (separate vending). If a SD card of other type is used, its operation is not guaranteed.
- When "formatting" of a SD card is performed, use the FAT16.
- At inserting the SD card into the card slot, pay attention to the direction of the card.
Further, do not press the SD card forcibly into the card slot. Otherwise, there is a risk of damaging this product and the SD card.
- Pay attention so that foreign objects do not enter into the card slot.
- Do not pull out the SD card nor cut off power supply when the SD card is reading.

Notification

- During input of the sound signal line, reading by the SD card is not performed even if it is inserted.
- If the SD card is inserted during playing of a tone, data transfer is performed after playing of the tone has been finished.
- When the SD card is reading, input of the sound signal line has no effect.

7 How to use

Turn on power supply of the product. By short-circuiting the common line and each signal line, it operates as follows.

- LED light: The LED light lights during short circuit of the common line and each optical signal line.
The LED light blinks during short circuit of the common blink line and each optical signal line.
- Tone: A tone is played by short-circuit of the common line and each sound signal line.
For the playing method by each operation mode, refer to "7-1. Bit input mode" and, "7-2. Binary input mode".
- Sound reduction: When the common line and the sound reduction signal line are short circuited, a sound pressure level of the played tone is lowered.

7-1. Bit input mode

- By short-circuiting the common line and each sound signal line, a tone is played that corresponds to each channel.
- If there is short circuit of the two or more sound signal lines and the common line at the same time, a tone of the CH with a larger number is played.

Priority order of signal input

CH8>CH7>CH6>CH5>CH4>CH3>CH2>CH1

- When this product is operated by the start of power supply, it takes about 0.5sec. until a tone is played.
- Regarding the timing chart in the case of operating this product by control of the signal line, refer to the figure at the right side.

Input timing chart of the sound signal line

Input timing chart of the optical signal line

7-2. Binary input mode

- By short-circuiting the common line and each sound signal line, a tone among the No.1 to 32 is played, depending on the state of each short circuit. (Refer to the Corresponding table for binary input.)
- When this product is operated by the start of power supply, it takes about 0.5sec. until a tone is played.
- Regarding the timing chart in the case of operating this product by control of the signal line, refer to the figure at the right side.

Corresponding table for binary input (Example: Type D)

Tones	Input contacts								Tones	Input contacts							
	CH1 (Skyblue)	CH2 (Yellow)	CH3 (Pink)	CH4 (Bright green)	CH5 (Red)	CH6 (Orange)	CH7 (Green)	CH8 (Blue)		CH1 (Skyblue)	CH2 (Yellow)	CH3 (Pink)	CH4 (Bright green)	CH5 (Red)	CH6 (Orange)	CH7 (Green)	CH8 (Blue)

No.14 A September	0	1	1	1	0	0	0	0	No.30 Yankee Doodle	0	1	1	1	1	0	0	0
No.15 Doyoubino Kobito	1	1	1	1	0	0	0	0	No.31 When the Saint Go Marching In	1	1	1	1	1	0	0	0
No.16 Akino Kehai	0	0	0	0	1	0	0	0	No.32 Londonderry Air	0	0	0	0	0	1	0	0

* The "1" in this table means short circuit of the sound signal line and the common line.

* In the case of input contacts which are not described in the table, the sound "5. Rapid Hi-Lo" is played.

Notification

- Although pop noise is sometimes generated at ON/OFF of power supply, it is not a failure.
- If power supply or signal lines are switched on simultaneously at the use of plural units, a shift of playing the tone/blinking period will occur.

8 Rearranging Method of the Color Arrangement

It is possible to rearrange the arrangement of the LED light unit.
Detach the head cover in accordance with the following procedure.

- (1) Loosen the shaft screws and detach the head cover.
- (2) Rearrange the LED light unit.
- (3) After finishing the work, fit the parts which were detached at (1) and (2), in the reverse procedure. (Recommended tightening torque of the shaft screw: 0.7N•m)

* Combine them while aligning into the notch of the LED light unit.

WARNING

- Be sure to carry out the work after cutting off the power supply.

CAUTION

- When wiping off the dirt on the surface of the LED light unit and head cover, do not use benzine, thinner, and/or alcohol. Or else, there is a risk of deformation and/or discoloration.
- Do not perform rearrangement with the LED light unit of another product. Or else, it will become a cause of failure.
- Be sure to tighten the shaft screw with the recommended tightening torque value. If the torque is lower than the recommended value, water proofness, dust proofness and resistance to earthquakes will decrease.
- When a plurality of units with a same color are used, current capacity of the contact becomes "Number of the units with a same color × current capacity of the contact per one stack," because all units with the same color are illuminated via one signal line. Select the relay which satisfies the current capacity of the contact when used.
(Example) In the case of a four-stack red LED light unit, current capacity of the contact becomes:
 $4 \text{ (stacks)} \times 100 \text{ (mA)} = 400\text{mA}$
- Use the shafts which are exclusive for each number of stack, adapted to the stack number of the LED light unit. Otherwise, it will become a cause of failure.
- Do not touch the spring of the LED light unit. Otherwise, it will become a cause of failure.
- Do not rotate the LED light unit after combining the LED light unit. Otherwise, there is a risk of damage.

Notification

- For the LED light unit, it is possible to increase or decrease the number of stack from 1 to 4. When the LED light unit and the shaft for exclusive use are necessary due to increase or decrease of the number of stages, please inquire to each sales office or technical consultation service written in the last page.

9 Before Asking for Repair

Contents of trouble	Matters to be confirmed	Method of action/treatment
Sound is not generated.	Is the power supplied?	Confirm the wiring and voltage of power supply. (5. Wiring Method)
	Are the common line and the signal line correctly short-circuited?	Confirm the wiring. (5. Wiring Method)
	Is the volume of sound set to the minimum level or not?	Adjust the volume. (6-2. Adjustment of sound volume)
A different channel is played.	Are the common line and the signal line correctly short-circuited?	Confirm the wiring. (5. Wiring Method)
	Are the selection switches correctly chosen?	Confirm the selection switches. (6-3. Selection switch)
SD card is not read.	Is the power supplied?	Confirm the wiring. (5. Wiring Method)
	Are the data for tone combination stored in the SD card?	Confirm the data in the SD card. (6-4-1. Preparation of tone combination data)
	Are the name and contents of the file for tone combination correct?	
	Is the location of data storage correct?	
	Is the SD card inserted correctly?	Confirm the SD card. (6-4-2. Transfer of tone combination data)
	Is the SD card of our company's optional item used?	
	Is the volume of sound set to the minimum level or not?	Adjust the volume. (6-2. Adjustment of sound volume)
The LED light unit cannot be lit.	Is the power supplied?	Confirm the wiring and voltage of power supply. (5. Wiring Method)
	Are the common line and signal line correctly short-circuited?	Confirm the wiring. (5. Wiring Method)
The LED light unit cannot blink.	Is the power supplied?	Confirm the wiring and voltage of power supply. (5. Wiring Method)
	Are the blinking common line and the signal line correctly short-circuited?	Confirm the wiring. (5. Wiring Method)

* If the product does not operate even if it is mounted and manipulated correctly, please inquire to each sales office or technical consultation service written in the last page.

10 Specification

■ Specification

Name of the model	LKEH-□02F□	LKEH-□10F□	LKEH-□20F□	LKEH-□12F□	LKEH-□02F□UL
Rated voltage	24V DC	100V AC (50/60Hz)	220V AC (50/60Hz)	120V AC (50/60Hz)	24V DC Class 2
Operating voltage range	24V DC±10%	100V AC±10%	220V AC±10%	120V AC±10%	24V DC±10%
Power consumption	1stack 10.6W	1stack 17.0W			1stack 10.6W

Maximum current consumption	0.65A	0.33A	0.16A	0.30A	0.65A
Sound pressure level	* Fit the product on the plate of □ 300mm, and measure the level with the sound 5."Rapid Hi-Lo" at the distance of 1m from the center of the product, in the front direction. * The sound pressure level may be lowered depending on the tone and environment of usage.				
Sound reduction level	20dB ± 2dB (Playing of the sound 5."Rapid Hi-Lo," at the maximum volume level)				
Signal input method	Bit input / binary input				
Fixing time of sound input signal	100ms or more (level input)				
Starting time	At the start of power supply: 500ms or less / At the start of signal line: 300ms or less				
Number of playing channels	Bit input: 8 channels / Binary input : 32 channels				
Priority order of channels	CH8 > CH7 > CH6 > CH5 > CH4 > CH3 > CH2 > CH1				
Input interface	16 signal lines (optical: 5 lines/ sound: 8 lines/ sound reduction/ common line/ blinking common line) Selection switch / SD card slot				
Incorporated number of sounds	32 kinds				
Light source of the LED light unit	LED				
Number of blinks	60 times/min. ± 3 times				
Operating temperature range	-10 to 50°C (Maximum surrounding air temperature rating of 50°C)				
Relative humidity	85%RH or less (No dew condensation shall exist.)				
Mounting direction	Forward direction only				
Protection structure	IP53 (Mounting only in the forward direction)				
Insulation resistance	500V DC, 1MΩ or more (charged metal part – non-charged metal part)				
Withstand voltage	500V AC, 1 min. (Between charged metal part – non-charged metal part)	1000V AC, 1 min. (Between charged metal part – non-charged metal part)	1500V AC, 1 min. (Between charged metal part – non-charged metal part)	1000V AC, 1 min. (Between charged metal part – non-charged metal part)	500V AC, 1 min. (Between charged metal part – non-charged metal part)
Resistance against vibration	19.6m/s ²				
Mass	One stack 1.8 kg ±10%	One stack 2.5 kg ±10%			One stack 1.8 kg ±10%
	Two stacks 2.0kg ±10%	Two stacks 2.7kg ±10%			Two stacks 2.0kg ±10%
	Three stacks 2.2kg ±10%	Three stacks 2.9kg ±10%			Three stacks 2.2kg ±10%
	Four stacks 2.4 kg ± 10%	Four stacks 3.1 kg ±10%			Four stacks 2.4 kg ± 10%
