# RS Pro II Series, Male 50 Way Straight Cable Mount SCSI Connector, Plug In

## Product Details:

### SCSI (II) Internal Terminators

All SCSI buses need to be terminated. This means both ends of the bus get a pull-up resistor construction to eliminate signal reflections that would occur from the physical ends of the bus.

This range of SCSI-2 terminators allow a SCSI-2 bus to be terminated directly on the back of a drive inside a system. A through terminator can be used to terminate a drive with only one SCSI interface on the end of a SCSI line, or can be used as a 'straight through' to extend a cable.

## Specifications:

Gender:	Male
Number of Contacts:	50
Body Orientation:	Straight
Mounting Type:	Cable Mount
Termination Method:	Plug In
Series:	II
