

## PCI 10/100 Mbps and Gigabit network card

### PCI 10 / 100 Mbps and Gigabit network cards

Designed for the latest multimedia applications which require high bandwidth, this PCI bus auto sensing network card supports both Ethernet 100BASE-TX protocol for high speed transmissions at 100 Mbit / s, and the Ethernet 10BASE-T protocol for 10 Mbit / s operation.

The user is fully guided through installation of drivers and diagnostic tools are available via a graphic interface. A must-have for those wishing to extend their personal network.

1 x RJ45 port.

Realtek 8139D chipset.

Drivers included for Novell, Windows 3.11 / 95 / 98 / Me / NT / 2000, PC / TCP, Linux SCO, Lan Manager, Lantastic and MAC OS (Apple).

30049: 10 / 100 MBps card, Full duplex PCI Bus 2.1, 2.2.

Full Duplex. Support for Boot EPROM (EPROM optional).

32 / 64 Bit.

301160: 32 bit Gigabit card. Slot PCI32 or 64 bits. Drivers for Windows 95 / 98 / Me, NT, 2000 / XP, Netware and Linux.
