3) INSTALLATION INSTRUCTIONS AND DETAILS

CAUTION

Always check the water temperature before using. The recommended domestic hot water supply temperature should not exceed 65°C.

The British Burns Association recommends 37°C to 37.5°C as a comfortable bathing temperature for children. In premises covered by the care standards act 2000, the maximum mixed water outlet temperature is 41°C.

The hoses are universally suitable for all bathroom and shower applications and are all manufactured and tested to the requirements of BSEN 1113:2008.

The strong outer casing encloses an inner liner which cannot twist and cause restriction to the water flow. The WRAS material used in these hoses resists bacteria build up.

When connecting this hose to an appliance or showerhead ensure sealing washers are in place.
