

3M™ Fuel™ X2 Safety Glasses

Glasses Fuel X2 is an evolutionary step forward in the design of lightweight frames without supporting elements of glass from the bottom.

Product Features:

- Adjustable rubber temples
- Polycarbonate lenses absorb 99.9 percent of UV radiation
- Luminaire comprising glass only from the top
- Meets impact protection requirements of low energy EN166
- Soft adjustable nose
- For each pair comes with a storage bag microfiber

Symbol of product 71506-00000M

DE272934659

Color lens Clear

Optical Protection UV protection with good visibility colors

Lens coating Coating to prevent scratching and fogging

Marking the lens 2C-1.2.3M.1.FT

Applications Architecture
Forestry or horticulture
Light maintenance and repair

Type of lenses Polycarbonate lenses

Frame color Brown

Impact Resistance Loss of high speed and low power in extreme temperatures (-5 to +55 ° C)

Compliance with standards EN 166:2001

Light transmittance 93%

Designation Holder 3M Fuel X2 230.1 CE EN166 FT
